International Taxation of Income from Services under Double Taxation Conventions Marta Castelon,2016-04-24 The provision of international services has increased enormously mainly due to the precipitous growth of the digital economy Accordingly the interpretation and application of double taxation conventions DTCs to income from

services has become a dominant focus in the international taxation. This multiple award winning book is an indispensable tool for practitioners and a major contribution to the debate about tax reform. It responds to the need for a comprehensive overview of the tax opportunities and risks relating to the provision of international services. It also offers the first in depth analysis of the taxation of income from services vis-à-vis the multilateral instrument MLI resulting from the OECD's Base Erosion and Profit Shifting BEPS initiative. With the thorough analysis of the international taxation of income from services over the last two centuries the author sheds new light on present tax policy debates and develops workable proposals for bringing brick and mortar DTCs into the digital reality. With an abundance of case studies, treaty interpretations, appraisals of policy discussions and practical solutions the author examines every aspect of the subject including the following: the Model DTCs of the OECD, the United Nations, Germany and the United States; their similarities and differences; relationships among the MLI, the Model DTCs and specific DTCs; development of the provisions dealing with services in the DTCs; how tax authorities and courts of different countries e.g. the United States, Germany, Brazil, India and China apply DTC provisions on the taxation of international services; opportunities and risks relating to different business practices such as the subcontracting of services, provisions for the hiring out of labour, the secondment of employees and the engagement of contract and toll manufacturers; practical questions about the taxation of different distribution models from fully edged distributors to commissionaires; challenges and proposals relating to the differentiation between various types of services under DTCs; the permanent establishment concept; to what extent the structure, purposes and scope of DTCs differ from those of the General Agreement on Trade in Services GATS; how changes in the US Model DTC of 2016 affect international service provisions and proposed changes to amending the OECD and UN Model DTCs; viable proposals to simplify DTC provisions dealing with service income and align them with current challenges such as the digital economy and the increasing volume of remote services are offered particularly in light of the likely impact of the BEPS package and its subsequent MLI. This book is poised to become one of the key practice resources for tax lawyers, in-house counsel and policymakers in the coming years.

Interested academics too will benefit from the author's skill in recognizing the ongoing role of taxation fundamentals in the major revolution currently underway.

Energia

Progresiva Japhet M. Kariuki, 2025-02-04 This volume discusses the political economy of energy transition in Latin America and the Caribbean LAC region. Viewed through the lens of emerging progressive movements with energy at the forefront the book explores how so-called Energia Progresiva can act as a driving force to address climate challenges, foster sustainable development and ease the transition to a knowledge-based economy setting the course for the future of Latin America and the Caribbean. Analyzing diverse contexts and realities faced by different countries in the region it examines potential challenges and obstacles, opportunities and policy implications. Chapters in the volume are organized around three unifying

themes Chapters in the first section provide an intertemporal analysis of energy transition in selected countries in the LAC region Chapters in the second section discuss the paradoxical relationship between regional energy insecurity and natural resource abundance The final section looks toward the future and the expected evolution of the region s energy industry This volume will be of interest to researchers and students of the Latin America and Caribbean energy landscape as well as development practitioners and business consultants working on energy and infrastructure projects in the region
