**Circular Economy and the Law** Feja Lesniewska, Katrien Steenmans, 2023-02-02 This book explores the role of law and policy in circular economy transitions and their impacts on justice, including on distributional equity and recognition and procedural rights, especially for people already marginalised under the current dominant economic system. Amid increasing demand for virgin raw materials and unsustainable consumption and waste disposal that are driving the global ecological and climate crisis, there are growing calls to urgently transition to circular economies. Despite an increasing number of circular approaches being adopted, implemented and integrated in national and local laws and policies, the number of commercially successful business stories remains isolated. Moreover, questions about whether circular economy laws and policies are delivering fair and just global outcomes need to be addressed. This book examines this significant knowledge gap to understand legal experiences including justice and equity issues in the global context so that these can inform wider design and implementation. The book begins by explaining the concept of a circular economy and its context within wider issues of sustainable development and justice. The first part of the book then examines the legal context of the circular economy by analysing legal forms in practice and those recommended in wider scholarship before considering how these could impact on existing inequity and injustices globally.

The second part delivers an empirical understanding of the implications of the law on circular economy approaches and the global equity and justice dimensions through two case studies on solid waste management and forestry The final part addresses legal opportunities and challenges for wider implementation of circular economy approaches that incorporate justice into its framing This book will be of great interest to students scholars and practitioners of environmental and natural resource law and policy circular economy industrial ecology natural resource management and sustainable development more broadly [Arts-Based Methods in Education Around the World](#) Xiangyun Du,Tatiana Chemi,2022-09-01 Arts Based Methods in Education Around the World aims to investigate arts based encounters in educational settings in response to a global need for studies that connect the cultural inter cultural cross cultural and global elements of arts based methods in education In this extraordinary collection contributions are collected from experts all over the world and involve a multiplicity of arts genres and traditions These contributions bring together diverse cultural and educational perspectives and include a large variety of artistic genres and research methodologies The topics covered in the book range from policies to pedagogies from social impact to philosophical conceptualisations They are informative on specific topics but also offer a clear monitoring of the ways in which the general attention to the arts in education evolves through time
