Tribal Culture, Continuity, and Change Anita Srivastava Majhi, 2010 Study conducted among the Bhil tribes in Udaipur District Rajasthan during 1999 to 2004 **Our New Human Consciousness** Terry Sands, 2011-05 Every few thousand years our human culture experiences a massive evolutionary transformation In the next few years our consciousness will change very rapidly and move us beyond anything we can presently imagine This change of consciousness is happening naturally to each of us now and it will affect every aspect of how we think how we live and how we love We are a culture in search of its spirit and this change of consciousness is evolutionarily next for humankind on this planet When the awareness opens one may search many avenues and attractions for truth and enlightenment and find the search lacking in result The next step may be the path of Self discovery But the direction on this path will not be given to us by a great teacher who comes down from the mountaintop with answers cast in stone but rather by lots of little great teachers who could be called pathfinders And to move into this new consciousness we will transform the mind and the way it works with new mental skills and mental technology Our success is inevitable The ease or difficulty with which we achieve this success is still in formation We will survive the transition physically The question is whether we will survive psychologically Psychological survival in this transition depends on only one thing Developing the ability and inner discipline to completely instantaneously unquestioningly and continuously adapt to change **The Scientific Roll and Magazine of Systematized Notes**

Sorenson, 2021-05-22 Principal must be aware that there are individual teacher resisters who have a reason to voice their concerns about a proposed instructional change or reform Therefore a critical question must be contemplated What s a principal to do Does the school leader dismiss resisters as whiners who are forever griping Or must a principal seriously contemplate the voices of discontent Are the campus grumblings within the context of change real in nature If so what is the message that a principal must be attuned to and then in response handle if not overcome These serious queries are the underlying basis for the seven principal tactics addressed in the book Typically teacher resistance is a function of disruption aimed at a change employees believe will alter their current work habits and impact teaching or instructional patterns Teachers in general are accepting of the status quo The more variation or modification to the status quo or to the current working process and or the teaching and learning environment the more resistance Responding to
