Challenging Consumption Pathways Sustainable Future:

Challenging Consumption Anna R. Davies, Frances Fahy, Henrike Rau, 2014-05-16 Sustainable consumption is a central research topic in academic discourses of sustainable development and global environmental change. Informed by a number of disciplinary perspectives this book is structured around four key themes in sustainable consumption research: Living, Moving, Dwelling and Futures. The collection successfully balances theoretical insights with grounded case studies on mobility, heating, washing and eating practices and concludes by exploring future sustainable consumption research pathways and policy recommendations. Theoretical frameworks are advanced throughout the volume especially in relation to social practice theory, theories of behavioural change and innovative visioning and backcasting methodologies. This groundbreaking book draws on some conceptual approaches which move beyond the responsibility of the individual consumer to take into account wider social, economic and political structures and processes in order to highlight both possibilities for and challenges to sustainable consumption. This approach enables students and policy makers alike to easily recognise the applicability of social science theories.

Futures: Imagining Socioecological Transformation Bruce Willems-Braun, 2018-02-02

Futures: Imagining Socioecological Transformation brings together leading scholars to explore how we might know, enact and struggle for the conjoined social and ecological transformations we need to achieve just and sustainable futures. The question of transformation and how it might be achieved is explored across a variety of topics and geographical sites and through heterodox analytical and theoretical approaches in a collective effort to move beyond a form of critique that hands down judgements to one that brings new ideas and new possibilities to life. Chapters are lively and original engagements with concrete situations that sparkle with creativity. Together they add up to an impressive study of how to live and what to struggle for in the complex socioecological landscapes of the Anthropocene. This book was previously published as a special issue of the *Annals of the Association of American Geographers*.

The Future of Consumer Society Maurie J. Cohen, 2017

Linking Ages Anna Wanka, Tabea Freutel-Funke, Sabine Andresen, Frank Oswald, 2024-11-14 When we ponder about whether it is time to finish a degree, start a family or retire, we often draw on age to make an assessment. When are we too young or too old to do something and what age is the right one? Age is a central social category for Western societies more than gender, ethnicity or social status. Age affects our social position, networks, lifestyles and aspirations. By asking what childhood and ageing research can learn from each other, this edited volume brings both fields into a fruitful dialogue. It touches upon topics like theories and methodology, space and time, health and care technologies, and digitalization, play, work and consumption, as well as violence, well-being and children's and older peoples' rights. This volume will appeal to scholars and students interested in childhood studies.
