Argonne Computing Newsletter ,1989-02 **Numerical Simulation of Reactive Flow in Hot Aquifers** Christoph Clauser,2012-12-06 This product consisting of a CD ROM and a book deals with the numerical simulation of reactive transport in porous media using the simulation package SHEMAT Processing SHEMAT SHEMAT Simulator for HEat and MASS Transport is an easy to use general purpose reactive transport simulation code for a wide variety of thermal and hydrogeological problems in two or three dimensions The book is a richly documented manual for users of this software which discusses in detail the coded physical and chemical equations Thus it provides the in depth background required by those who want to apply the code for solving advanced technical and scientific problems The enclosed companion CD ROM contains the software and data for all of the case studies The software includes user friendly pre and post processors which make it very easy to set up a model run it and view the results all from one platform Therefore the software is also very suitable for academic or technical hands on courses for simulating flow transport of heat and mass and chemical reactions in porous media You can find a link to the updated software on springer.com

Digital Forensic Investigation of Internet of Things (IoT) Devices Reza Montasari,Hamid Jahankhani,Richard Hill,Simon Parkinson,2020-12-09 This book provides a valuable reference for digital forensics practitioners and cyber security experts operating in various fields of law enforcement incident response and commerce It is also aimed at researchers seeking to obtain a more profound knowledge of Digital Forensics and Cybercrime Furthermore the book is an exceptional advanced text for PhD and Master degree programmes in Digital Forensics and Cyber Security Each chapter of this book is written by an internationally renowned expert who has extensive experience in law enforcement industry and academia The increasing popularity in the use of IoT devices for criminal activities means that there is a maturing discipline and industry around IoT forensics As technology becomes cheaper and easier to deploy in an increased number of discrete everyday objects scope for the automated creation of personalised digital footprints becomes greater Devices which are presently included within the Internet of Things IoT umbrella have a massive potential to enable and shape the way that humans interact and achieve objectives These also forge a trail of data that can be used to triangulate and identify individuals and their actions As such interest and developments in autonomous vehicles unmanned drones and smart home appliances are creating unprecedented opportunities for the research communities to investigate the production and evaluation of evidence through the discipline of digital forensics

BRL-CAD Tutorial Series: Volume 4--Converting Geometry between BRL-CAD and Other Formats , **Drone and UAV Forensics** Hudan Studiawan,Kim-Kwang Raymond Choo,2025-11-01 This textbook is designed to introduce and deepen the understanding of drone technology in the field of forensic science It is tailored for university level courses blending theoretical knowledge with practical application This makes it an ideal resource for advanced level students in digital forensics computer science criminal justice and related fields Real world case studies are designed throughout the text

providing practical insights and demonstrating how the principles and techniques discussed can be applied in actual forensic investigations This hands on approach not only aids in understanding theoretical concepts but also provides valuable practical experience This textbook not only focuses on current practices in drone forensics but also discusses the future challenges and advancements expected in the field This forward thinking approach ensures that readers are not only well versed in current methodologies but are also prepared for emerging technologies and evolving legal landscapes This aspect makes the textbook a long term resource for students and researchers interested in or working in drone forensics
