**Optimization and Logistics Challenges in the Enterprise** Wanpracha Chaovalitwongse, Kevin C. Furman, Panos M.

Pardalos, 2009-06-17 In a world with highly competitive markets and economic instability due to capitalization industrial competition has increasingly intensified In order for many industries to survive and succeed they need to develop highly effective coordination between supply chain partners dynamic collaborative and strategic alliance relationships and efficient

logistics and supply chain network designs. Consequently in the past decade there has been an explosion of interest among academic researchers and industrial practitioners in innovative supply chain and logistics models, algorithms and coordination policies. Mathematically distinct from classical supply chain management, this emerging research area has been proven to be useful and applicable to a wide variety of industries. This book brings together recent advances in supply chain and logistics research and computational optimization that apply to a collaborative environment in the enterprise.

**Machine Learning and Intelligent Communications** Xiangping, Bryce, Zhai, Bing, Chen, Kun, Zhu, 2019-10-27. This volume constitutes the refereed post conference proceedings of the Fourth International Conference on Machine Learning and Intelligent Communications MLICOM 2019 held in Nanjing, China in August 2019. The 65 revised full papers were carefully selected from 114 submissions. The papers are organized thematically in machine learning, intelligent positioning and navigation, intelligent multimedia processing and security, wireless mobile network and security, cognitive radio and intelligent networking, IoT, intelligent satellite communications and networking, green communication and intelligent networking, ad hoc and sensor networks, resource allocation in wireless and cloud networks, signal processing in wireless and optical communications, and intelligent cooperative communications and networking.

**Advances in Intelligent Systems and Interactive Applications** Fatos, Xhafa, Srikanta, Patnaik, Albert Y. Zomaya, 2017-10-30. This book presents research papers from diverse areas on novel Intelligent Systems and Interactive Systems and Applications. It gathers selected research papers presented at the 2nd International Conference on Intelligent and Interactive Systems and Applications IISA2017, which was held on June 17-18, 2017 in Beijing, China. Intelligent Systems (IIS) are systems that interact with human beings, media or virtual agents in intelligent computing environments. The emergence of Big Data and the Internet of Things have now opened new opportunities in both academic and industrial research for the successful design and development of intelligent interactive systems. This book explores how novel interactive systems can be used to overcome various challenges and limitations previously encountered by human beings by combining machine learning algorithms and the analysis of recent trends. The book presents 125 contributions which have been categorized into seven sections, namely: i) Autonomous Systems, ii) Pattern Recognition and Vision Systems, iii) E-Enabled Systems, iv) Mobile Computing and Intelligent Networking, v) Internet and Cloud Computing, vi) Intelligent Systems, and vii) Various Applications. It not only offers readers extensive theoretical information on Intelligent and Interactive Systems but also introduces them to various applications in different domains.
