*Globalization and Security Relations across the Taiwan Strait* Ming-chin Monique Chu,Scott L. Kastner,2014-11-27 This book presents an interdisciplinary examination of cross Taiwan Strait relations and the complex dynamics at play in the region Since the election of Ma Ying Jeou as Taiwan's president in 2008 the relationship across the Taiwan Strait long viewed as one of Asia's most volatile potential flashpoints has experienced a remarkable détente Whether the relationship has been truly transformed however remains an open question and the Taiwan Strait remains a central regional and global security issue A return to turbulence in the Taiwan Strait could also add a new dimension of instability in the already tense maritime disputes in the East and South China Seas While the relationship across the Taiwan Strait remains critically important it is also changing rapidly and the chapters in this volume present new thinking to help make sense of complex cross Strait dynamics

Specifically these essays explore different security and or globalization dimensions of China Taiwan ties as well as the globalization security linkages that have emerged As the balance of power in Asia shifts dramatically several chapters in this volume explore how traditional security forces are evolving At the same time there are new dynamics emerging as a consequence of globalization forces such as the tremendous economic and social integration across the Taiwan Strait and several chapters in this volume consider some of these new problems Finally several chapters consider the often under researched dynamics associated with the globalization security interface such as cyber threats transnational criminal networks and the security spill over impact of production globalization This book will of much interest to students of Chinese
