Science-fiction Studies ,2007 **The Cultural Imaginary of Terrorism in Public Discourse, Literature, and Film** Michael Frank,2017-06-14 This study investigates the overlaps between political discourse and literary and cinematic fiction arguing that both are informed by and contribute to the cultural imaginary of terrorism Whenever mass mediated acts of terrorism occur they tend to trigger a proliferation of threat scenarios not only in the realm of literature and film but also in the statements of policymakers security experts and journalists In the process the discursive boundary between the factual and the speculative can become difficult to discern To elucidate this phenomenon this book proposes that terror is a halfway house between the real and the imaginary For what characterizes terrorism is less the single act of violence than it is the fact that this act is perceived to be the beginning or part of a potential series and that further acts are expected to occur As turn of the century writers such as Stevenson and Conrad were the first to point out this gives terror a fantastical dimension a fact reinforced by the clandestine nature of both terrorist and counter terrorist operations Supported by contextual readings of selected texts and films from *The Dynamiter* and *The Secret Agent* through late Victorian science fiction to post 9 11 novels and cinema this study explores the complex interplay between actual incidents of political violence the surrounding discourse and fictional engagement with the issue to show how terrorism becomes an object of fantasy Drawing on research from a variety of disciplines *The Cultural Imaginary of Terrorism* will be a valuable resource for those with interests in the areas of Literature and Film Terrorism Studies Peace and Conflict Studies Trauma Studies and Cultural Studies *Allelopathy* Zahid A. Dream of Literal Sleep? Seo-Young Chu,2011-01-15 In culture and scholarship science fictional worlds are perceived as unrealistic and altogether imaginary Seo Young Chu offers a bold challenge to this perception of the genre arguing instead that science fiction is a form of high intensity realism capable of representing non imaginary objects that elude more traditional realist modes of representation Powered by lyric forces that allow it to transcend the dichotomy between the literal and the figurative science fiction has the capacity to accommodate objects of representation that are themselves neither entirely figurative nor entirely literal in nature Chu explores the globalized world cyberspace war trauma the Korean concept of han and the rights of robots all as referents for which she locates science fictional representations in poems novels music films visual pieces and other works ranging within and without previous demarcations of the science fiction genre In showing the divide between realism and science fiction to be illusory Do Metaphors Dream of Literal Sleep sheds new light on the value of science fiction as an aesthetic and philosophical resource one that matters more and more as our everyday realities grow increasingly resistant to straightforward representation **Who Shaped Science Fiction?** Robert
