Connecting Grammaticalisation Studies In Functional And Structural Linguistics:

Connecting Grammaticalisation Jens Nørgård-Sørensen, Lars Heltoft, Lene Schøsler, 2011 Grammar is seen as a complex sign system and as a consequence grammatical change always comprises semantic change The book introduces the concept of connecting grammaticalisation to describe the formation restructuring and dismantling of such complex paradigms It offers a broad general discussion of theoretical issues and three case studies Exaptation and Language Change Muriel Norde, Freek Van de Velde, 2016-02-24 This volume is the first collection of papers that is exclusively dedicated to the concept of exaptation a notion from evolutionary biology that was famously introduced into linguistics by Roger Lass in 1990 The past quarter century has seen a heated debate on the properties of linguistic exaptation its demarcation from other processes of linguistic change and indeed the question of whether it is a useful concept in historical linguistics at all The contributions in the present volume reflect these diverging points of view Along with a comprehensive introduction covering the history of the notion of exaptation from its conception in the field of biology to its adoption in linguistics the book offers extensive discussion of the concept from various theoretical perspectives detailed case studies as well as critical reviews of some stock examples The book will be of interest to scholars working in the fields of evolutionary linguistics historical linguistics and the history of linguistics World Lexicon of Grammaticalization Tania Kouteva, Bernd Heine, Bo Hong, 2019-08-08 Based on analysis of more than 1 000 languages this volume reconstructs more than 500 processes of grammatical change in the languages of the world **Diachronic Construction Grammar** Jóhanna Barðdal, Elena Smirnova, Lotte Sommerer, Spike Gildea, 2015-07-15 Construction Grammar as a framework offers a new perspective on traditional historical questions in diachronic linguistics and language change how do new constructions arise how should competition in diachronic variation be accounted for how do constructions fall into disuse and how do constructions change in general formally and or semantically and with what implications for the language system as a whole This volume offers a broad introduction to the confluence of Construction Grammar and historical syntax and also detailed case studies of various instances of syntactic change modeled within Construction Grammar The volume demonstrates that Construction Grammar as a theory is particularly well suited for modeling historical changes in morphosyntax and it also documents challenging new phenomena that require a theoretical account within any competing framework of syntactic change **Indexicality** Peter Juul Nielsen, María Sol Sansiñena, 2024-06-04 The book offers the first full scale focused treatment of linguistic indexicality as a tool for analysis and explanation of the organization of linguistic structures The book demonstrates the application of the concept of indexicality in the description of a broad range of linguistic phenomena from the internal workings of morphology via relations within syntactic constructions to lexical and grammatical elements designed to hook on to features outside the clause in the interactional context The book offers a focused treatment of the general nature of linguistic indexicality in the larger perspective of the semiotics of language including examinations of

domain straddling indexical functions It presents studies of the role of indexicality in synchrony and diachrony with descriptive cases from a number of languages from diverse language families and it examines the way indexicality enters into the mechanisms of change including examinations of semiotic shifts from indexical to symbolic function and vice versa The book is relevant for researchers and students in historical and synchronic linguistics from a variety of linguistic frameworks with an interest in the role of semiotics in linguistic analysis Paradigms regained: Theoretical and empirical arguments for the reassessment of the notion of paradigm Gabriele Diwald,Katja Politt,2022 The volume discusses the breadth of applications for an extended notion of paradigm Paradigms in this sense are not only tools of morphological description but constitute the inherent structure of grammar Grammatical paradigms are structural sets forming holistic semiotic structures with an informational value of their own We argue that as such paradigms are a part of speaker knowledge and provide necessary structuring for grammaticalization processes The papers discuss theoretical as well as conceptual questions and explore different domains of grammatical phenomena ranging from grammaticalization morphology and cognitive semantics to modality aiming to illustrate what the concept of grammatical paradigms can and cannot yet explain **Linguistic Meaning Meets Linguistic Form** Patrick Duffley,2020-10-14 This book steers a middle course between two opposing conceptions that currently dominate the field of semantics the logical and cognitive approaches Patrick Duffley brings to light the inadequacies of both of these frameworks arguing that linguistic semantics must be based on the linguistic sign itself and on the meaning that it conveys across the full range of its uses The book offers 12 case studies that demonstrate the explanatory power of a sign based semantics dealing with topics such as complementation with aspectual and causative verbs control and raising wh words full verb inversion and existential there constructions It calls for a radical revision of the semantics pragmatics interface proposing that the dividing line be drawn between content that is linguistically encoded and content that is not encoded but still communicated While traditional linguistic analysis often places meaning at the level of the sentence or construction this volume argues that meaning belongs at the lower level of linguistic items where the linguistic sign is stored in a stable permanent and direct relation with its meaning outside of any particular context Building linguistic analysis from the ground up in this way provides it with a more solid foundation and increases its explanatory power Acta Societatis Linguisticae Europaeae ,2008 American Book Publishing Record ,2005 *Journal of Linguistics* ,2001 **Linguistics and Language Behavior Abstracts** ,2009-02 **Colorado Research in Linguistics** ,1994 **Structure and Function** Christopher Butler,Christopher S. Butler,2003 Volume one of a two volume set outlining and comparing three approaches to the study of language labelled structural functionalist Functional Grammar FG Role and Reference Grammar RRG and Systemic Functional Grammar SFG Studies in Language ,1977 *Folia orientalia* ,2013 Essays in Tai Linguistics Kalaya Tingsabadh,Arthur S. José Ruiz de Mendoza Ibáñez, Francisco González-García, Angela Downing, 2014-07-22 The differences among functionalist cognitivist and or constructionist models are generally taken to be not absolute but rather a matter of emphasis and degree with an increasing permeability between paradigms arising from cross fertilizing influences This book further explores this burgeoning area of research through the notion of functional cognitive space namely the topography of the space occupied by functional cognitivist and or constructionist models against the background of formalist approaches in general and of Chomsky s Minimalism in particular Specifically the twelve contributions in the present volume update the reader on recent developments in functionalism Systemic Functional Grammar Functional Discourse Grammar and Role and Reference Grammar and cognitivism Word Grammar Cognitive Construction Grammar and the Lexical Constructional Model Plotting cognitive space proves particularly adequate for situating the six models represented in this volume not only in relation to each other but also potentially with respect to a wide spectrum of functionalist cognitivist and or constructionist models

Language Acquisition After Puberty Judith R. Strozer, 1994 Bridging the gap between theoretical linguistics and language teaching Judith R Strozer explores what recent theoretical advances suggest about learning a language after childhood and the implications for the design and execution of a foreign language program Strozer outlines clearly in nontechnical language the major concepts of modern language theory from Chomsky s theory of language through the most recent discoveries about the abstract foundations of language She explains ideas about the evolution of a cognitive structure for language in the human brain a language faculty or Universal Grammar that gives humans alone the creative ability to generate the infinite expressions of language This innate universal schema for language endows humankind with a number a very broad principles applicable to all languages Turning to current advances in the theory of phrase structure which has replaced our 2 000 year old rules of grammar with highly abstract universal principles of language structure she relates the latest discoveries about the foundations of language to ideas about how children learn languages A child hearing a specific language can automatically set the parameters for the rules governing that particular language much like setting a binary switch But our ability to access this innate language mechanism automatically seems limited to childhood until physical maturity somehow changes this brain function Arguing that adults need to learn consciously the systems and structures of another language that children acquire unconsciously Strozer applies these latest theories about the nature of language and how we learn it to the design of foreign language programs for adults She concludes with recommendations for developing a new kind of teaching program that would draw on comparative language research and include new pedagogic approaches Presenting state of the art language theory in easily readable terms and illustrative examples this book will be of interest to everyone interested in the latest understanding of the relationship between the brain and language as well as to all professionals in linguistics and language education *Current Index to Journals in Education* ,1995
