## **Conscious Cooperation How To Create Successful Construction Projects:**

*Conscious Cooperation* Stuart Baker, 2012-09 This book is a guide on how to begin, nurture and finish successful construction projects. Written for contractors, property owners and anyone involved in the construction process, the book is rich in illustrative stories and point-by-point advice. It also contains powerful interviews with noted mediators, customers and construction professionals. It evolved out of years of working in the construction industry and learning to do just what is described. Contrary to widely held belief, it IS possible for construction projects to be successful for all concerned and even fun. Building on basic principles of clarity, mutual respect and intentional collaboration, this book takes the reader on a surprising journey into the dynamics involved in any successful working relationship, told here through the field of construction. It delves into the power of intention, assumption and expectation, and the importance of a positive attitude for any project. This book is hands-on and it is not theory. It is proven practices and real-life stories.

**Studies of the Cooperative Project ...** Cooperative project, Valery Tereshchenko, 1942 **The Guide to COIL Virtual Exchange** Jon Rubin, Sarah Guth, 2023-07-03 This is the authoritative guide to implementing COIL Virtual Exchange conceived and co-edited by one of the originators of this innovative approach to internationalization. Jon Rubin COIL the acronym for Collaborative Online International Learning is a central modality of what has come to be known as virtual exchange. Since its first iteration in 2002 it has gradually established itself as a mature pedagogy that is being increasingly implemented across the world and is validated by a growing body of research. COIL Virtual Exchange at its most essential is a bi-lateral online exchange involving the integration of existing courses across two or sometimes more institutions that are geographically and/or culturally distinct. To launch a COIL VE course the instructor of a class at a higher education institution in one location links online with a professor and his or her class in another region or country. Together their students engage and develop joint projects usually over a continuous five to eight week period. Compared to the limited number of students worldwide who can engage in study abroad COIL VE potentially opens up more equitable and inclusive participation in international education and intercultural experiences to all students. It involves them in rigorous disciplinary and interdisciplinary studies and promotes close and constructive engagement with students with different cultural perspectives. While many COIL courses are launched by individual instructors based on their research connections and online outreach they are being increasingly supported and led by dedicated COIL Coordinators who facilitate virtual exchanges and provide professional development. This comprehensive guide covers COIL VE pedagogy and provides examples of what takes place in the COIL.

classroom and explores what instructors and staff need to know to facilitate and support a variety of COIL courses across the curriculum. It addresses how institutional stakeholders especially those in leadership positions can develop and embed a successful COIL initiative at their institution. It offers varied perspectives of COIL viewed from different institutional and cultural vantage points from research universities, community and technical colleges and university systems and describes how COIL VE is developing in five different world regions presenting eleven case studies. The book concludes with a guide to thirteen global organizations that support COIL and other forms of VE. Additionally the book provides links to the COIL Connect for Virtual Exchange website <https://coilconnect.org> which includes an updated directory of organizations, an expanding database of faculty and institutions participating in COIL and looking for partners, course templates, survey data and case studies. This book offers faculty and administrators across the world whether formally involved in international education in service learning and community engagement or wanting to incorporate a cross cultural perspective in their disciplinary courses, theoretical foundations, guidance on effective collaboration and the strategic and pedagogical considerations to develop robust COIL VE courses and programs.

### **Region-Building in Southern Africa**

Chris Saunders, Gwinyayi Albert Dzinesa, Dawn Nagar, 2013-07-04. How successful have Southern African states been in dealing with the major issues that have faced the region in recent years? What could be done to produce more cohesive and effective region building in Southern Africa? In this original and wide ranging volume which draws on an interdisciplinary team of mainly African and African based specialists the key political, socio-economic and security challenges facing Southern Africa today are addressed. These include the various issues confronting the Southern African Development Community (SADC) and its institutions such as HIV/AIDS, migration and xenophobia, land grabbing and climate change and the role of the main external actors involved with the region including the United Nations, the European Union, the United States and China. The book also looks at the Southern African Customs Union and Southern African Development Finance Institutions including the Development Bank of Southern Africa and Industrial Development Corporation and issues of gender and peacebuilding. In doing so the book goes to the heart of analyzing the effectiveness of SADC and other regional organisations suggesting how region building in Southern Africa may be compared with similar attempts elsewhere in Africa and other parts of the world.
