

CONSTRUCTION MATERIALS, METHODS AND PLAN READING

CSI MasterFormat Document Organization

In the early 1960s the need for a uniform system for organizing specifications was identified and resulted in the publishing of the "CSI MasterFormat", named after its author, the Construction Specifications Institute (CSI). The CSI MasterFormat introduced the seventeen division format associated with the ability to organize an infinite number of subject sections. In 1978, Construction Specifications Canada (CSC) joined with CSI to produce the first edition of MasterFormat.

The MasterFormat incorporates a complete organizational format for project manuals by including bidding requirements, contract forms, conditions of the contract and the General Requirements, in addition to the Technical Specifications Divisions 02 through 16. This document has been the construction industry's consensus standard for the organization of technical information. It is accepted by the U.S. federal agencies and most state and local governments. It was subsequently adopted by the McGraw-Hill Sweets Catalogs, the R.S. Means cost estimating books, and other organizations.

MasterFormat is intended to classify detailed construction information into a standard order or sequence by materials and methods. This is done by establishing a detailed master list of divisions, sections and parts. The MasterFormat facilitates construction communication, promotes standardization in the industry, and facilitates the retrieval of information. It is primarily used for the organization of project manuals, detailed construction cost estimates, and product data filing.

CSI MasterFormat Structure

The MasterFormat groups information into these areas:

- Bidding Requirements and Forms
- Contract Forms (Agreement)
- Conditions of the Contract (General and Supplementary)
- General Requirements (Division 01)
- Technical Specifications Division (02 through 16)
