Managing Performance in Construction Leonhard E. Bernold, S. M. AbouRizk, 2010-07-06 Construction is the country's single largest manufacturing industry. However, it is a sector that lacks benchmarks against which to gauge performance. This modern thinking intends to provide insight to construction productivity improvement. Taking cues from manufacturing sectors such as computer, automobile, and chemical companies, this book will apply the lessons learned to building construction. Supported with a range of pedagogical devices, the book will be of equal value to construction managers and civil engineers and students with different learning methods. **Earthquake Design Practice for Buildings** Edmund D. Booth, David Key, 2006 Talking about earthquake engineering, this second edition is intended for practising structural engineers, including those with little or no knowledge of the subject, and also for advanced engineering students. It discusses the provisions of seismic codes, particularly Eurocode 8.

Handbook for developing watershed plans to restore and protect our waters, **Builder's Guide to Accounting** Michael C. Thomsett, 2001-07 This book includes a self-test section at the end of each chapter. Test yourself, then check answers in the back of the book to see how you score. CD-ROM included.
