

Corporate Reputation and Competitiveness

Reputation is at the heart of a company's success. This unique book, from four of the world leaders in reputation research, reveals the very latest thinking about how organizations can improve, whether they are in the public, commercial or not-for-profit sector. The philosophy is to match the external (customer) perception of the organization and what they value, to the internal (customer-facing employee) perception and their organizational values. Only when these are 'harmonized' can the firm be truly competitive.

Corporate Reputation and Competitiveness takes the subject of Reputation Management further than any previous text. It covers some familiar ground: dealing with the media, crisis management, the use of logos and other aspects of corporate identity. But it also argues for Reputation Management to be seen as a way of managing the long-term strategy of an organization. It presents a new approach to measuring reputation, one that relies on surveying customers and employees on their view of the corporate character. It carries detailed results of studies showing the interaction of customer-employee perspectives and how and why customer views influence commercial performance.

The book introduces the Corporate Reputation Chain – the potential to link staff and customer satisfaction via the organization's reputation, and to the Corporate Personality Scale – a way of measuring what customers and staff feel about the organization itself. Detailed case studies from a variety of different companies and sectors reveal the practice of Reputation Management. *Corporate Reputation and Competitiveness* is intended to be useful to both managers and students on postgraduate courses.
