*Political Culture, Change, and Security Policy in Nigeria* Kalu Kalu,2018-03-15 Demonstrating how political culture facilitates or distorts political preferences and political outcomes this book explores how the historical development of social conditions and the current social structures shape understandings and constrain individual and collective actions within the Nigerian political system Political Culture Change and Security Policy examines the extent to which specific norms and socialization processes within the political and civic culture abet corruption or the proclivity to engage in corrupt practices and how they help reinforce political attitudes and civic norms that have the potential to undermine the effectiveness of government It also delineates specific doctrinal models and strategic framework essential to the development and implementation of Nigeria s national security policy as well as innovative approaches to national development planning Professor Kalu N Kalu offers an exhaustive study that integrates several quantitative models in addressing a series of theoretical and empirical questions that inform historical and contemporary issues of the Nigerian project The general premise is that it is not enough to simply highlight the problems of the state and address the what question we must also address the why and how questions that drive political change policy preferences and competing political outcomes

*Corruption and Government* Susan Rose-Ackerman,1999-06-28 Corruption is a worldwide phenomenon Developing countries and those making a transition from socialism are particularly at risk This book suggests how high levels of corruption limit investment and growth and lead to ineffective government Corruption creates

economic inefficiencies and inequities but reforms are possible to reduce the material benefits from payoffs Corruption is not just an economic problem however it is also intertwined with politics Reform may require changes in both constitutional structures and the underlying relationship of the market and the state Effective reform cannot occur unless both the international community and domestic political leaders support change

Fighting Corruption in Public Procurement Sope Williams-Elegbe, 2012-11-06 Anti corruption measures have firmly taken centre stage in the development agenda of international organisations as well as in developed and developing countries One area in which corruption manifests itself is in public procurement and as a result States have adopted various measures to prevent and curb corruption in public procurement One such mechanism for dealing with procurement corruption is to debar or disqualify corrupt suppliers from bidding for or otherwise obtaining government contracts This book examines the issues and challenges raised by the debarment or disqualification of corrupt suppliers from public contracts Implementing a disqualification mechanism in public procurement raises serious practical and conceptual difficulties which are not always considered by legislative provisions on disqualification Some of the problems that may arise from the use of disqualifications include determining whether a conviction for corruption ought to be a pre requisite to disqualification bearing in mind that corruption thrives in secret resulting in a dearth of convictions Another issue is determining how to balance the tension between granting adequate procedural safeguards to a supplier in disqualification proceedings and not delaying the procurement process A further issue is determining the scope of the disqualification in the sense of determining whether it applies to firms natural persons subcontractors subsidiaries or other persons related to the corrupt firm and whether disqualification will lead to the termination of existing contracts The book compares and contrasts the legal practical and institutional approaches to the implementation of the disqualification mechanism in the European Union the United Kingdom the United States the Republic of South Africa and the World Bank
