Cosmic Connection An Extraterrestrial Perspective:

Carl Sagan's Cosmic Connection Carl Sagan,2000-08-31 A classic book by the world's most famous scientist and science visionary back in print with a new perspective *The Cosmic Connection* Carl Sagan,1975 [The Cosmic Connection](#) Carl Sagan,1975

Civilized Life in the Universe George Basalla,2006-01-19 From Plutarch and Kepler to Stephen Hawking and Carl Sagan this book offers a fascinating history of scientific speculation about life in outer space Basalla traces an unbroken but twisting chain of ideas passed from one scientist to the next and from science to popular culture He even examines the influence of popular culture on science Sagan always admitted how much Burroughs Martian novels influenced his speculations about Mars Throughout Basalla shows that scientific belief in and search for extraterrestrial civilizations is a complex impulse part secularized religious and part anthropomorphic

Oracles of Science Karl Giberson,Mariano Artigas,2009-02-27 Oracles of Science examines the popular writings of the six scientists who have been the most influential in shaping our perception of science how it works and how it relates to other fields of human endeavor especially religion Biologists Stephen Jay Gould Richard Dawkins and Edward O Wilson and physicists Carl Sagan Stephen Hawking and Steven Weinberg have become public intellectuals articulating a much larger vision for science and what role it should play in the modern worldview The scientific prestige and literary eloquence of each of these great thinkers combine to transform them into what can only be called oracles of science Their controversial often personal sometimes idiosyncratic opinions become widely known and perceived by many to be authoritative Curiously the leading oracles of science are predominantly secular in ways that don't reflect the distribution of religious beliefs within the scientific community Many of them are even hostile to religion creating a false impression that science as a whole is incompatible with religion Karl Giberson and Mariano Artigas offer an informed analysis of the views of these six scientists carefully distinguishing science from philosophy and religion in the writings of the oracles This book will be welcomed by many who are disturbed by the tone of the public discourse on the relationship between science and religion and will challenge others to reexamine their own preconceptions about this crucial topic

Space, Time, and Aliens Steven J. Dick,2020-05-11 In this comprehensive and interdisciplinary volume former NASA Chief Historian Steven Dick reflects on the exploration of space astrobiology and its implications cosmic evolution astronomical institutions discovering and classifying the cosmos and the philosophy of astronomy The unifying theme of the book is the connection between cosmos and culture or what Carl Sagan many years ago called the cosmic connection As both an astronomer and historian of science Dr Dick has been both a witness to and a participant in many of the astronomical events of the last half century This collection of papers presents his reflections over the last forty years in a way accessible to historians philosophers and scientists alike From the search for alien life to ongoing space exploration efforts readers will find this volume full of engaging topics relevant to science society and our collective future on planet Earth and beyond

[The Nature of Nature](#) Bruce Gordon,William Dembski,2014-04-29 The intellectual and cultural battles now raging over

theism and atheism conservatism and secular progressivism dualism and monism realism and antirealism and transcendent reality versus material reality extend even into the scientific disciplines This stunning new volume captures this titanic clash of worldviews among those who have thought most deeply about the nature of science and of the universe itself Unmatched in its breadth and scope The Nature of Nature brings together some of the most influential scientists scholars and public intellectuals including three Nobel laureates across a wide spectrum of disciplines and schools of thought Here they grapple with a perennial question that has been made all the more pressing by recent advances in the natural sciences Is the fundamental explanatory principle of the universe life and self conscious awareness to be found in inanimate matter or immaterial mind The answers found in this book have profound implications for what it means to do science what it means to be human and what the future holds for all of us

Gaither's Dictionary of Scientific Quotations Carl C. Gaither, Alma E. Cavazos-Gaither, 2008-01-08

Scientists and other keen observers of the natural world sometimes make or write a statement pertaining to scientific activity that is destined to live on beyond the brief period of time for which it was intended This book serves as a collection of these statements from great philosophers and thought influencers of science past and present It allows the reader quickly to find relevant quotations or citations Organized thematically and indexed alphabetically by author this work makes readily available an unprecedented collection of approximately 18 000 quotations related to a broad range of scientific topics

Evolutionary Perspectives on Human Reproductive Behavior Dori LeCroy, Peter Moller, 2000 A central aspect of human adaptation reproductive behaviour is studied through the multiple lenses of philosophy biology psychology and anthropology all united by an evolutionary perspective Although reproduction is an intrinsic mechanism of evolution this colloquium shows that reproductive behaviours yield new significance for evolution theory when re examined in a multidisciplinary setting This volume focuses on explication of the adaptive evolved nature of our own reproduction with topics such as how mate choice shaped human nature symmetry in mate selection the evolution of moral dispositions and the sexist order of the bonobos This look at reproduction as a mechanism of human evolution reveals underlying physiologic mechanisms as well as comparative and interesting cross cultural aspects that emerge from social sciences and anthropology
