### **Subsumption of Space**

Fujio Mizuoka,2024-12-21 This book takes a Marxist perspective to explore the dynamics of space By employing dialectical materialist logic it explains how a heterogeneous spatial configuration emerges through the dialectical process to transcend the contradiction generated by the subsumption incorporation of an sich pristine spaces into

society with a particular focus on the context of capitalism. The key concept here is subsumption as presented by Marx in *The Results of the Immediate Process of Production*. This book is first of its kind that thought provokingly demonstrates the dialectical logic of the production of space through the application of Marxist logic of subsumption. It succinctly argues that heterogeneous spatial configurations are produced through the society's effort to transcend these contradictions or the subsumption of space which transforms pristine space subsumed into a one point society in formal terms toward a heterogeneous spatial configuration resulting in an und *f r* sich produced space or space subsumed in real terms. The book also suggests the role of the produced space in potential utilization of space in social struggles. Based on this conceptual framework this book discusses the built environment the space embedded in people's minds and the effects of the capitalist business cycle on space. Ultimately it presents a compelling case for activists to harness the space produced in their social struggles.
