Nine year old Astrid has been reincarnated as an otome game villainess and now she's locked in a battle with fate that she refuses to lose Although she has found herself powerless to stop the sequence of events that she knows will end with her destruction that could all be about to change With a talent for magic and some knowledge from her geeky past life she's already made herself an automatic pistol an automatic rifle a shotgun a machine gun and a grenade launcher That's quite an arsenal for a little girl in a world where soldiers still use crossbows but it's still not enough Astrid won't stop until she has enough firepower to make her unassailable and that means bigger guns more combat experience and some morally questionable magic She's going to tear fate a new one even if it means bringing down an entire empire

Imprisoned By My Own Damn Mind is a journey through the life thoughts of a child arriving to adulthood who is unable to maintain any kind of relationship with any human being because of the negative thoughts in his head How did those thoughts get in his head Who put those thoughts inside his head and made him believe that the thoughts were absolutely true Labels were inaccurately placed on this young child without any explanation Educators accepted this term without any understanding of the impact to the child The child was separated from a normal setting and put into an abnormal setting and asked to behave normal Other children in the same age group of our child noticed him and his new environment Then the flood of horrible name calling came in and drowned our child in misery Of course our child internalized all this pain That gave voice to the prison guard in his head He got locked up in his head by the thoughts he thinks about himself daily Is there any freedom from this mind prison It's a sad tragedy when your closest friend is suicide You think he suicide has the only way of escape from all of the horrible pain you feel inside you Welcome to my tormented loneliness imprisoned by my own damn mind
