Constructing Cause In International Relations:

Constructing Cause in International Relations Richard Ned Lebow, 2014-02-20 Cause is a problematic concept in social science as in all fields of knowledge we organise information in terms of cause and effect to impose order on the world but this can impede a more sophisticated understanding. In his latest book Richard Ned Lebow reviews understandings of cause in physics and philosophy and concludes that no formulation is logically defensible and universal in its coverage. This is because cause is not a feature of the world but a cognitive shorthand we use to make sense of it. In practice causal inference is always rhetorical and must accordingly be judged on grounds of practicality. Lebow offers a new approach: inefficient causation that is constructivist in its emphasis on the reasons people have for acting as they do but turns to other approaches to understand the aggregation of their behaviour. This novel approach builds on general understandings and idiosyncratic features of context.

Reason and Cause Richard Ned Lebow, 2020-03-12 A cultural history of the concepts of reason and cause showing that they are culturally and historically local. **Emotional Choices** Robin Markwica, 2018-03-06 Why do states often refuse to yield to military threats from a more powerful actor such as the United States? Why do they frequently prefer war to compliance? International Relations scholars generally employ the rational choice logic of consequences or the constructivist logic of appropriateness to explain this puzzling behavior. Max Weber however suggested a third logic of choice in his magnum opus *Economy and Society*: human decision making can also be motivated by emotions. Drawing on Weber and more recent scholarship in sociology and psychology, Robin Markwica introduces the logic of affect or emotional choice theory into the field of International Relations. The logic of affect posits that actors' behavior is shaped by the dynamic interplay among their norms, identities, and five key emotions: fear, anger, hope, pride, and humiliation. Markwica puts forward a series of propositions that specify the affective conditions under which leaders are likely to accept or reject a coercer's demands. To infer emotions and to examine their influence on decision making, he develops a methodological strategy combining sentiment analysis and an interpretive form of process tracing. He then applies the logic of affect to Nikita Khrushchev's behavior during the Cuban missile crisis in 1962 and Saddam Hussein's decision making in the Gulf conflict in 1990-1, offering a novel explanation for why U.S. coercive diplomacy succeeded in one case but not in the other.

Constructing Historical Realism Martin Hall, 1999 In this study the author seeks to develop Historical Realism as a new approach to International Relations. Drawing on recent theoretical developments in International Relations and Historical Sociology, it is argued first that a distinction between constitutive and causal theory is necessary and second that this distinction makes comparisons at a high level of abstraction across time and space possible. The explanatory focus of Historical Realism is the political reproduction of states. States are seen as constantly facing a double security dilemma: it is being threatened or potentially threatened by two sets of rivals for revenue. At the level of abstraction of Historical Realism, states have two possible responses short of collapse to this double security dilemma. They can either pursue a fortifying mode

of political reproduction whereby the essence of their strategy is to prevent rivals from gaining strength Alternatively they can pursue an alliance building mode of political reproduction whereby they cooperate with or co opt rivals turning them into allies instead Which response states choose depend on the constitutive context they exist in and how this is changing The constitutive context is conceptualised with four dichotomous dimensions International systems it is argued can either be functionally differentiated or not and political relations in these systems can either be embedded in economic relations or not The societies from which states extract revenue can further either be competitive or not and either logically closed or open The second part of the study develops this conceptual framework in the contexts of Japanese political reproduction towards the end of the nineteenth century the political reproduction and failure of the Roman Republic and political reproduction in early medieval western Europe **Constructing the Stable State** Kathleen H. Hawk,2002-08-30 Examines what external actors can do to help move a war torn society in conflict toward a stable peace It is based on the premise that if external actors cannot figure out how to lay a foundation for a peace there will be decreasing support for international intervention and peacekeeping missions **Engineering Record, Building Record and Sanitary Engineer** ,1885 International Peace Research Newsletter ,1999 *Constructing International Relations* Karin M. Fierke,Knud Erik Jørgensen,1999 A

Baltic League as a Construct of the New Europe Marko Lehti,1999 The emergence of the idea of Baltic Sea unity and of Baltic cooperation seem to be the issues which unify the two big epoch making periods the end of the First World War and the end of the Cold War In both periods the Baltic Sea connection has been seen to offer a coordinate for remapping the location of the eastern Baltic nations the Estonians and Latvians in particular Why has the Baltic Sea area played so important a role as a construct of the new Europe This is the question examined in this study which focuses on the period after the First World War when the disintegration of European multinational empires meant a shift in the international system from the hegemony of a few great powers to the heterogeneity of small states As a part of this process the concepts of sovereignty and national self determination were redefined by the small states themselves so that they would manage to find their place in the world of the great powers One expression of this transition period was a lively Baltic cooperation which attained an exceptional pitch of intensity in the Europe of its time **Constructing a New Great Wall** Allen Russell Carlson,2000 Canadian International Relations Daniel R.
