Understanding Biocorrosion T Liengen, R Basseguy, Damien Feron, I Beech, V Birrien, 2014-11-14 Biocorrosion refers to corrosion influenced by bacteria adhering to surfaces in biofilms Biocorrosion is a major problem in areas such as cooling systems and marine structures where biofilms can develop This book summarises key recent research in this subject Part one looks at theories of biocorrosion and measurement techniques Part two discusses how bacteria and biofilms result in biocorrosion The final part of the book includes case studies of biocorrosion in areas as diverse as buildings fuels marine environments and cooling systems Provides a detailed overview of biocorrosion and the different scientific and or industrial problems related to microbially induced corrosion Introduces a variety of investigative techniques and methodologies that are employed in diagnosing and evaluating microbially induced corrosion Includes case studies on biodeterioration of building materials biocorrosion issues associated with diesel and biofuels marine biocorrosion corrosion of open recirculating cooling water systems and cooling system components the effect of H₂S on steel corrosion **Mechanical and**

Electro-chemical Interactions under Tribocorrosion Pierre Ponthiaux, Jean-Pierre Celis, 2021-08-22 Mechanical and Electro chemical Interactions under Tribocorrosion From Measurements to Modelling for Building a Relevant Monitoring Approach looks at progress in the field of tribocorrosion The work is a result of the efforts of the European tribocorrosion community gathered under the auspices of the European Corrosion Federation EFC within WP18 Tribocorrosion In addition to the handbook Testing Tribocorrosion of Passivating Materials Supporting Research and industrial Innovation published in 2012 this release describes the latest scientific approaches recognized and validated experimentally to address tribocorrosion Sections look at the phenomena of coupling through an understanding of the associated mechanisms and how to identify variables Final sections cover strategies to control and or extend the life of structures in a multi process coupling situation and an in depth description of the current state of the art on modeling approaches of tribocorrosion Reviews the multidisciplinary basics of tribocorrosion Includes insights into novel experimental approaches Provides insights into advanced modeling techniques of tribocorrosion Looks at the implication of results in the development of the monitoring of tribocorrosion **Testing Tribocorrosion of Passivating Materials Supporting Research and Industrial Innovation**

Jean-Pierre Celis, 2017-07-05 This first edition of Testing Tribocorrosion of Passivating Materials Supporting Research and Industrial Innovation A Handbook treats in a clear concise and practical manner an important material degradation and

protection matter It is designed as a handbook and provides a well structured approach of the basics needed to investigate the tribocorrosion behavior of passivating materials and to conduct in a correct way a laboratory investigation on it It provides answers on practical and theoretical approaches of tribocorrosion phenomena to engineers and medical persons involved with material assemblies subjected to aggressive environmental and mechanical conditions For academic researchers it is a pertinent tool assisting them in how they can perform a tribocorrosion investigation and obtain results that are correctly interpreted and can be exchanged Different parts of the book are illustrated with practical examples This handbook is truly an indispensable guide for every professional who comes into contact with the complex material degradation and protection processes that take place under combined corrosion and wear conditions Fields of interest include transportation aeronautics maritime rail automotive medical implants orthopaedics dentistry biochemistry food production energy production and machining The coordination of this handbook writing was done by Professor Jean Pierre Celis Katholieke Universiteit Leuven Belgium and Professor Pierre Ponthiaux Ecole Centrale Paris France assisted by twelve European experts who contributed jointly to the nine chapters of this handbook Main topics dealt with are tribocorrosion phenomena in medical and industrial sectors depassivation and repassivation phenomena impact on synergism in tribocorrosion specific testing techniques coupling tribology to corrosion design of a testing protocol and normalisation

Cyclic Oxidation of High Temperature Materials EFC 27 Michael Schutze, 2024-11-15 Proceedings of a workshop organised by the European Federation of Corrosion Frankfurt Main 1999 the papers review the current understanding of materials behaviour under cyclic oxidation **Handbook of Corrosion Engineering** Pierre Roberge, 1999-09-30 Reduce the enormous economic and environmental impact of corrosion Emphasizing quantitative techniques this guide provides you with Theory essential for understanding aqueous atmospheric and high temperature corrosion processes Corrosion resistance data for various materials Management techniques for dealing with corrosion control including life prediction and cost analysis information systems and knowledge re use Techniques for the detection analysis and prevention of corrosion damage including protective coatings and cathodic protection More *Modifications of Passive Films* P. Marcus, 2023-06-09 The modification of passive films is a promising method of improving the corrosion resistance of metallic materials As well as reviewing a wide spectrum of film modifications and their effects on passivity and to corrosion resistance papers presented at this international symposium deal with chemical composition chemical states and electronic properties of passive films
