A Generation of Excellence Robert Craig Brown, 2007-01-01 The Canadian Institute for Advanced Research originated at the University of Toronto in the early 1980s Since that time it has gone from a small independent centre to an important and revered institution with a significant role in the study of sciences social sciences and humanities in Canada A Generation of Excellence is a detailed history of the CIAR from its humble beginnings to its ascension as one of the most important research organizations in the country Beginning in the summer of 1982 with the CIAR merely a conception in the minds of senior scholars at the University of Toronto Craig Brown takes us through the process of realization detailing the early years of the Institute under the presidency of Dr Fraser Mustard From early struggles to eventual triumphs Brown examines the CIAR's pursuit of an ethos to explore fundamental issues in the social sciences and humanities by funding teams of researchers showing how success was painstakingly achieved The rise of the CIAR is deftly illustrated by pairing its earliest projects with the twentieth anniversary Congress held in 2002 in honour of the Institute and two decades of research A Generation of Excellence tells the story of one of the country's most remarkable institutions [An Immigrant's Journey into the Cosmos](#) Dr. N Y Misconi, 2015-05-19 Astronaut Dr Buzz Aldrin commended the author citing his proposal to transform the Space Shuttle fleet before retiring it into a space tourism fleet which would generate profits for NASA Dr Donald Brownlee Director of NASA's STARDUST Mission that flew to comet Wild 2 said this about the author One of Dr Misconi's most significant publications was his 1979 Nature paper on streaming of interstellar grains into the solar system The paper predicted that interstellar dust should stream into the solar system from the direction the then detectable interstellar gas and it also described the interaction of the extrasolar particles with the solar wind and the IP Interplanetary magnetic field The paper was timely and highly prophetic as the stream of interstellar dust was detected just a few years later by instruments on the Ulysses and Galileo spacecraft Dr Seung Soo Hong former chair of the Astronomy Department at Seoul National University in Seoul South Korea said this about the author I still remember in one of those brain storming sessions he suggested to fire a big gun from a satellite to a nearby asteroid and to observe the scattered light of the Sun and man made source by the dust excavated from the asteroid surface The Space Astronomy Laboratory team couldn't materialize the idea then But to think back this was a brilliant idea with which one can characterize the nature of ligorith particles for a reasonable price *Arthur E. Haas - The Hidden Pioneer of Quantum Mechanics* Michael Wiescher, 2021-09-23 The book highlights the personal and scientific struggles of Arthur Erich Haas 1884 1941 an Austrian Physicist from a wealthy Jewish middle class family whose remarkable accomplishments in a politically hostile but scientifically rewarding environment deserve greater recognition Haas was a fellow student of both Lise Meitner and Erwin Schrödinger and was also one of the last doctoral students of Ludwig Boltzmann Following Boltzmann's suicide Haas was forced to submit a more independent doctoral thesis in which he postulated new approaches in early quantum theory actually introducing the idea of the Bohr

radius before Niels Bohr It is the lost story of a trailblazer in the fields of quantum mechanics and cosmology a herald of nuclear energy and applications of modern science This biography of Haas is based on new and previously unpublished family records and archived material from the Vienna Academy of Science and the University of Notre Dame which the author has collected over many years From his analysis of the letters documents and photos that rested for nearly a century in family attics and academic archives Michael Wiescher provides a unique and detailed insight into the life of a gifted Jewish physicist during the first half of the twentieth century It also sheds light on the scientific developments and thinking of the time It appeals not only to historians and physicists but also general readers All appreciate the record of Haas interactions with many of the key figures who helped to found modern physics *Bright Galaxies, Dark Matter, and Beyond* Ashley Jean Yeager, 2023-08-15

How Vera Rubin convinced the scientific community that dark matter might exist persevering despite early dismissals of her work We now know that the universe is mostly dark made up of particles and forces that are undetectable even by our most powerful telescopes The discovery of the possible existence of dark matter and dark energy signaled a Copernican like revolution in astronomy not only are we not the center of the universe neither is the stuff of which we re made Astronomer Vera Rubin 1928 2016 played a pivotal role in this discovery By showing that some astronomical objects seem to defy gravity s grip Rubin helped convince the scientific community of the possibility of dark matter In *Bright Galaxies Dark Matter and Beyond* Ashley Jean Yeager tells the story of Rubin s life and work recounting her persistence despite early dismissals of her work and widespread sexism in science Yeager describes Rubin s childhood fascination with stars her education at Vassar and Cornell and her marriage to a fellow scientist At first Rubin wasn t taken seriously she was a rarity a woman in science and her findings seemed almost incredible Some observatories in midcentury America restricted women from using their large telescopes Rubin was unable to collect her own data until a decade after she had earned her PhD Still she continued her groundbreaking work driving a scientific revolution She received the National Medal of Science in 1993 but never the Nobel Prize perhaps overlooked because of her gender She s since been memorialized with a ridge on Mars an asteroid a galaxy and most recently the Vera C Rubin Observatory the first national observatory named after a woman
