### ***Accounts of Innocence***

Joseph E. Davis, 2005 Since a new sensitivity and orientation to victims of injustice arose in the 1960s categories of victimization have proliferated Large numbers of people are now characterized and characterize themselves as sufferers of

psychological injury caused by the actions of others In contrast with the familiar critiques of victim culture Accounts of Innocence offers a new and empirically rich perspective on the question of why we now place such psychological significance on victimization in people s lives Focusing on the case of adult survivors of childhood sexual abuse Joseph E Davis shows how the idea of innocence shaped the emergence of trauma psychology and continues to inform accounts of the past and hopes for the future in therapy with survivor clients His findings shed new light on the ongoing debate over recovered memories of abuse They challenge the notion that victim accounts are an evasion of personal responsibility And they suggest important ways in which trauma psychology has had unintended and negative consequences for how victims see themselves and for how others relate to them An important intervention in the study of victimization in our culture Accounts of Innocence will interest scholars of clinical psychology social work and sociology as well as therapists and victim activists [Surviving Child Sexual Abuse](#) Liz Hall,Siobhan Lloyd,2003-12-16 Surviving Child Sexual Abuse is a handbook for survivors and their helpers It examines what sexual abuse entails for a child and why it happens Personal and professional issues for helpers are addressed and the long term effects of sexual abuse are examined The strengths of survivors are acknowledged together with the supportive alliances they have formed with partners helpers and friends The theme of disclosure is examined in depth and the main themes in therapeutic work with survivors are discussed and methods are described which can be used in such therapeutic work This highly successful book ends with an evaluation of the issues involved in training helpers for working with survivors The book is aimed at therapists including social workers counsellors in public organizations and private practice clinical psychologists psychiatrists nurses health visitors general practitioners police and psychotherapists
