hopeful Elizabeth Kolbert Pulitzer Prize winning author of THE SIXTH EXTINCTION From the author of Junkyard Planet a journey into the surprising afterlives of our former possessions Downsizing Decluttering Discarding Sooner or later all of us are faced with things we no longer need or want But when we drop our old clothes and other items off at a local donation center where do they go Sometimes across the country or even halfway across the world to people and places who find value in what we leave behind In Secondhand journalist Adam Minter takes us on an unexpected adventure into the often hidden multibillion dollar industry of reuse thrift stores in the American Southwest to vintage shops in Tokyo flea markets in Southeast Asia to used goods enterprises in Ghana and more Along the way Minter meets the fascinating people who handle and profit from our rising tide of discarded stuff and asks a pressing question In a world that craves shiny and new is there room for it all Secondhand offers hopeful answers and hard truths A history of the stuff we ve used and a contemplation of why we keep buying more it also reveals the marketing practices design failures and racial prejudices that push used items into landfills instead of new homes Secondhand shows us that it doesn t have to be this way and what really needs to change to build a sustainable future free of excess stuff   *Crash Course in Technology Planning* Christopher D. Brown,2016-07-18 This easy to use primer will empower anyone even those with no IT background to face the challenge of adding one or more technologies to library services or maintaining existing technologies Most of the public libraries in the United States are operating on tight budgets without allocation for IT personnel in school libraries the librarian often takes on the lion s share of IT responsibility This book is an invaluable guide for library staff members who are put in the position of maintaining their own networks and computers with very little training or support Authored by an assistant library director with years of firsthand experience working as a solo IT manager within public libraries this guide provides practical information about overcoming the unique challenges of managing IT in a smaller organization juggling multiple job roles being limited by a restrictive budget and working directly with the public Crash Course in Technology Planning addresses a wide variety of IT topics in the library sphere providing information in a logical manner and order It begins with an explanation of triaging existing IT issues then moves into diagnosing and repairing both individual PCs as well as the library Local Area Network LAN The following chapters cover other important topics such as the best way to inventory computers and equipment how to budget for and procure new equipment and recommended ways for an IT layperson to set and achieve goals   *Introduction to Information Systems* R.
