Haug, 2012-12-06 These proceedings contain lectures presented at the NATO Advanced Study Institute on Concurrent Engineering Tools and Technologies for Mechanical System Design held in Iowa City Iowa 25 May 5 June 1992 Lectures were presented by leaders from Europe and North America in disciplines contributing to the emerging international focus on Concurrent Engineering of mechanical systems Participants in the Institute were specialists from throughout NATO in disciplines constituting Concurrent Engineering many of whom presented contributed papers during the Institute and all of whom participated actively in discussions on technical aspects of the subject The proceedings are organized into the following five parts Part 1 Basic Concepts and Methods Part 2 Application Sectors Part 3 Manufacturing Part 4 Design Sensitivity Analysis and Optimization Part 5 Virtual Prototyping and Human Factors Each of the parts is comprised of papers that present state of the art concepts and methods in fields contributing to Concurrent Engineering of mechanical systems The lead off papers in each part are based on invited lectures followed by papers based on contributed presentations made by participants in the Institute *Microtransducer CAD* Arokia Nathan, Henry Baltes, 2012-12-06 Computer aided design CAD of semiconductor microtransducers is relatively new in contrast to their counterparts in the integrated circuit world Integrated silicon microtransducers are realized using microfabrication techniques similar to those for standard integrated circuits ICs Unlike IC devices however microtransducers must interact with their environment so their numerical simulation is considerably more complex While the design of ICs aims at suppressing parasitic effects microtransducers thrive on optimizing the one or the other such effect The challenging quest for physical models and simulation tools enabling microtransducer CAD is the topic of this book The book is intended as a text for graduate students in Electrical Engineering and Physics and as a reference for CAD engineers in the microsystems industry *CAD* 78 Gareth W.
