Low-Data Regimes for Cybersecurity Markus Bayer,2025-08-20 In today's fast paced cybersecurity landscape professionals are increasingly challenged by the vast volumes of cyber threat data making it difficult to identify and mitigate threats effectively. Traditional clustering methods help in broadly categorizing threats but fall short when it comes to the fine grained analysis necessary for precise threat management. Supervised machine learning offers a potential solution but the rapidly changing nature of cyber threats renders static models ineffective and the creation of new models too labor intensive. This book addresses these challenges by introducing innovative low data regime methods that enhance the machine learning process with minimal labeled data. The proposed approach spans four key stages: Data Acquisition, Leveraging active learning with advanced models like GPT 4 to optimize data labeling, Preprocessing Utilizing GPT 2 and GPT 3 for data augmentation to enrich and diversify datasets, Model Selection Developing a specialized cybersecurity language model and using multi level transfer learning, Prediction Introducing a novel adversarial example generation method grounded in explainable AI to improve model accuracy and resilience

C Code Projects for Beginner Students (Ages 8-16) Udayakumar

G.Kulkarni,2025-08-08 This eBook is an essential guide for school students aged 8 to 16 who are starting their coding journey in C programming. It aims to help young learners apply basic programming concepts through practical hands on academic projects. The book includes a diverse range of projects from management systems like Bank Management and Student Record Management to engaging games such as Number Guessing and Tic Tac Toe and practical utilities like a Simple Calculator. Each project features a clear system design, code implementation and a step by step guide on how to set up, compile and run the code. A key feature of these projects is their single file modular design which makes the code easy to understand and debug. Students will gain practical experience with fundamental C concepts like data types, loops, functions and file handling.

Programming in C++ T. B. D'Orazio,2004 D Orazio's Programming in C Lessons and Applications provides an accessible introduction to programming in C. It teaches the C language and object oriented design to students with no previous programming experience. The focus is on developing programs for solving a variety of problems. Each chapter of the book is divided into two parts: Lessons and Applications. The Lessons teach C language elements and simple programming techniques, and the Applications teach program design. A step by step methodology for program development is presented early in the text and reinforced throughout with the help of application examples and over thirty case studies

C++ Larry R. Nyhoff,1999 Emphasizing abstract data types, ADJs throughout this work covers the containers and algorithms from the Standard Template Library, introducing the most up to date and powerful tools in C
