Ptak, Chad Smith, 2019 In the 1950s a method called Material Requirements Planning or MRP changed the world of manufacturing forever. But times have changed, customer tolerance times are shorter, product variety and complexity has increased and supply chains have spread around the world. MRP is dramatically failing in this New Normal. Demand Driven Material Requirements Planning DDMRP Version 3 presents a practical, proven and emerging method for supply chain planning and execution that effectively brings the 1950s concept into the modern era. The foundation of DDMRP is based upon the connection between the creation, protection and acceleration of the flow of relevant materials and information to drive returns on asset performance in the New Normal. Using an innovative multi echelon Position Protect and Pull approach, DDMRP helps plan and manage inventories and materials in today's more complex supply scenarios with attention being paid to ownership, the market, engineering, sales and the supply base. It enables a company to decouple forecast error from supply order generation and build in line to actual market requirements and promotes better and quicker decisions and actions at the planning and execution level. DDMRP is already in use by MAJOR Global 1000 companies. This book is THE definitive work on DDMRP and will be required as courseware for all those taking the Certified Demand Driven Planner CDDP Program. New Features in Version 3. Full color with the use in specific, consistent and focused ways to clearly and effectively highlight planning, execution and model reconfiguration priorities. Expanded Appendix E looking at the most recent innovations of DDMRP. Revised graphics scattered throughout the book

More than ever before, organizations need a pipeline of professionals who possess cultural agility, the ability to quickly, comfortably and successfully work in cross cultural and international environments. Filled with illustrative examples from a wide range of organizations, including the Peace Corps, the U.S. military and many Fortune 500 companies, Cultural Agility offers business leaders and human resource professionals a step by step guide for creating and implementing highly effective, cutting edge talent management practices to increase cross cultural competence throughout their organizations. Validated through several years of her research and practice, Paula Caligiuri outlines the Cultural Agility Competency Framework. This framework sets the foundation for the strategic talent management practices organizations need to effectively build a pipeline of culturally agile professionals, such as how to attract, recruit and select professionals with cultural agility or those with the greatest propensity to readily develop cultural

agility Cultural Agility also provides guidance for creating organizational cultures and HR systems to support the development of a workforce that is culturally agile For example international assignments are commonly enlisted as a means of developing global leaders but these have proven to be only partially effective for building cultural agility Caligiuri offers training and development practices that organizations can use in a learning system to continually build professionals cross cultural competencies including specific recommendations for designing truly developmental international assignments This book is a must have resource for human resource professionals and all business leaders who know that the key to their organizations success in today s complex global economy is their culturally agile human talent
