takes place in the present age but this would be to impute to me a very narrow view A multitude of opinions feelings and propensities are now in existence which owe their origin to circumstances unconnected with or even contrary to the principle of equality Thus if I were to select the United States as an example I could easily prove that the nature of the country the origin of its inhabitants the religion of its founders their acquired knowledge and their former habits have exercised and still exercise independently of democracy a vast influence upon the thoughts and feelings of that people About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

**Democracy in America ? Volume 2 by Alexis de Tocqueville** Alexis Tocqueville, 2017-09-09 In Volume II of the book Tocqueville covers topics such as How religion in the United States avails itself to democratic tendencies Roman Catholicism in the United States pantheism equality and the perfectibility of man science literature art how democracy has modified the English language spiritual fanaticism education and equality of the sexes      **Democracy in America - Volume 2** Alexis De Tocqueville, 2018-08-14 Democracy in America Volume 2 Large Print By Alexis De Tocqueville I think that in no country in the civilized world is less attention paid to philosophy than in the United States The Americans have no philosophical school of their own and they care but little for all the schools into which Europe is divided the very names of which are scarcely known to them Nevertheless it is easy to perceive that almost all the inhabitants of the United States conduct their understanding in the same manner and govern it by the same rules that is to say that without ever having taken the trouble to define the rules of a philosophical method they are in possession of one common to the whole people To evade the bondage of system and habit of family maxims class opinions and in some degree of national prejudices to accept tradition only as a means of information and existing facts only as a lesson used in doing otherwise and doing better to seek the reason of things for one's self and in one's self alone to tend to results without being bound to means and to aim at the substance through the form such are the principal characteristics of what I shall call the philosophical method of the Americans But if I go further and if I seek amongst these characteristics that which predominates over and includes almost all the rest I discover that in most of the operations of the mind each American appeals to the individual exercise of his own understanding alone America is therefore one of the countries in the world where philosophy is least studied and where the precepts of Descartes are best applied Nor is this surprising The Americans do not read the works of Descartes because their social condition deters them from speculative studies but they follow his maxims because this very social condition naturally disposes their understanding to adopt them In the midst of the continual movement which agitates a democratic community the tie which unites one generation to another is relaxed or broken every man readily loses the trace of the ideas of his forefathers or takes no care about them Nor can men living in this state of society derive their belief from the opinions of the class to which they belong for so to speak there are no longer any classes or those which still exist are composed of such mobile elements that their body can never exercise a real control over its members As to the influence which the intelligence of one man has on that of another it must necessarily be very limited in a country where the citizens placed on the footing of a general similitude are all closely seen by each other and where as no signs of incontestable greatness or superiority are perceived in any one of them they are constantly brought back to their own reason as the most obvious and proximate source of truth We are delighted to publish this classic book as part of our extensive Classic Library collection Many of the books in our collection have been out
