## **Demographic Gaps In American Political Behavior:**

Demographic Gaps in American Political Behavior Patrick Fisher, 2018 Demographic Gaps in American Political Behavior examines the political behavior of various groups in the United States in an effort to demonstrate how demographic backgrounds and socialization affect political behavior Media coverage has disproportionately focused on the red state versus blue state divide leaving the impression that American political behavior is determined solely by place of residence This however ignores the numerous other political divides that exist in the United States today In order to better conceptualize the landscape of American political behavior Patrick Fisher analyzes the political gaps in six different demographics income religion gender race age and geography and examines the effect these political gaps have on public opinion policy and party positioning Written in an accessible fashion Demographic Gaps in American Political Behavior uses contemporary examples and data from the 2008 and 2012 elections to help readers understand how and why demographic background has the potential to greatly influence political opinions and behavior Provided by publisher **The**

**Generational Gap in American Politics** Patrick Fisher, 2022-09-30 This book examines the history of the generational gap in American politics with an emphasis on the remarkable contemporary gap Using data derived primarily from the American National Election Studies ANES 2020 National Election Pool A P VoteCast and the Pew Research Center Patrick Fisher argues that the political environment experienced by successive generations as they have come of age politically influences political attitudes throughout one's life The result is that different generations have distinct political leanings that they will maintain over their lifetimes Fisher examines each generation from the Greatest Generation through to Generation Z who have recently started to come of voting age He cites the entry of the Millennial Generation and Generation Z into the electorate as completely changing the generational dynamics of American politics through their distinct political leanings that are significantly to the left of older generations As a result he concludes that demographically politically economically socially and technologically the generations are more different from each other now than at any time in living memory The Generational Gap in American Politics will appeal to a scholarly and public audience interested in American politics in general and political behavior in particular **Why Don't Women Rule the World?** J. Cherie Strachan, Lori M.

Poloni-Staudinger, Shannon Jenkins, Candice D. Ortobals, 2019-07-12 Why Don't Women Rule the World is unlike other texts in its comparative approach and strong theoretical underpinnings It has interesting pedagogical features that will resonate with comparative scholars Americanists and those who integrate public policy analysis into the course Rebecca E Deen University of Texas at Arlington Why don't women have more influence over the way the world is structured Written by four leaders within the national and international academic caucuses on women and politics Why Don't Women Rule the World helps students to understand how the underrepresentation of women manifests within politics and the impact this has on policy Grounded in theory with practical job related activities the book offers a thorough introduction to the study of women and

politics and will bolster students political interests ambitions and efficacy Key Features A comparative perspective expands students awareness of their own intersectional identities and the varying effects of patriarchy on women worldwide A variety of policy areas highlighted throughout the book illustrates how different theories are applied to real world situations Multiple political engagement activities keep students engaged with the content

**Insufficient Representation** Patrick Fisher,2020-07-07 Not Enough Representation The Disconnect between Congress and Its Citizens examines how representative the United States Congress is among different demographic groups and how representational issues affect Americans perception of Congress potentially threatening its legitimacy The opening chapter analyzes political representation from the perspective of the nature of the relationship between voters and legislators addressing why Congress is so demographically unrepresentative The book will then focus on outcome the representativeness of the legislature in terms of its members demographic backgrounds Congress simply put is not demographically representative of the American public There are significant gaps between Congress and the American public on the basis of race gender religion wealth and generation Since members of Congress do not adequately represent the diversity in their electorate this suggests that Congress in turn does not make policies that advocate for the citizenry as a whole The book first examines the nature of the relationship between citizens and legislators before analyzing demographic groups in the general population and comparing their preferences to how Congressional members of that demographic group legislate In the process the book ties representation to many of the hot button issues that polarize both the American public and Congress Congress is not descriptively representative of the U S population Many groups of Americans have historically been and continue to be underrepresented in Congress More than ever before this underrepresentation is troublesome to a substantial number of Americans and problematic for American democracy

**Beyond Red State and Blue State** Matthew H. Olson,John Green,2017-09-19 Beyond Red State and Blue State Electoral Gaps in the 21st Century American Electorate explores the many demographic gaps that exist within the American electorate This book is designed to explore the most important voting gaps in American politics today It shows that twenty first century Americans are divided on a wide range of political fronts that go far beyond the somewhat simplistic red state blue state rubric that has become so popular in American political discourse Reality is far more complex The authors capture and explain this complexity through a collection of chapters by leading scholars of a range of voting gaps including racial ethnic gaps the marriage gap the worship attendance gap the income class gap the rural urban gap the gender gap and the generation gap Also included is a chapter by a leading political pollster and strategist Anna Greenberg on how campaigns use information about voting gaps
