Best Practices for Terrestrial Sequestration of Carbon Dioxide (TSCD) , *The Relationship Between Health and Environment Under the Lens of Climate Change: Insights for Policy Makers* Paolo Vineis,Greta Colombi,2025-02-14 The past year 2023 has been so far the hottest on track and sure enough it won't keep this record long We have already reached almost 1.5°C above the preindustrial average and the recent first Global Stocktake carried out at COP 28 which was held in Dubai last December 2023 revealed that we still need to enhance dramatically the efforts at the international level to meet Paris Agreement's goals The impacts of climate change along with other forms of anthropic pressures not only involve devastating consequences for ecosystems biodiversity and the resilience of the socio-ecological systems we live in but as it is emerging from the latest trends in scientific research it poses under serious threat also public health and well-being

Crop ecology, cultivation and uses of cactus pear Food and Agriculture Organization of the United Nations,2018-06-05 Cactus plants are precious natural resources that provide nutritious food for people and livestock especially in dryland areas Originally published in 1995 this extensively revised edition provides fresh insights into the cactus plant's genetic resources physiological traits soil preferences and vulnerability to pests It provides invaluable guidance on managing the resource to support food security and offers tips on how to exploit the plant's culinary qualities

Cross-cutting issues in the water, land, energy and food security nexus: Perspectives from sub-saharan africa Felix Kwabena Donkor,Mulala Danny Simatele,Henry Bikwibili Tantoh,2023-06-27 **Climate Change, Variability and Sustainable Food Systems** Victor Owusu,Bright Asante,Emmanuel Donkor,Abiodun Ogundeji,Enoch Owusu-Sekyere,2023-02-16 The Resettlement of Sex Offenders after Custody David Thompson,Terry Thomas,2017-07-14 Circles of Support and Accountability is a voluntary initiative that assists people with convictions for sexual offences to resettle in the community People leaving prison with such convictions often have difficulties in resettling They carry the burden of the conviction itself which may be both stigmatising and isolating and they are the subject of sex offender register requirements parole and other supervisory conditions Circles of Support and Accountability in the UK started over ten years ago and have slowly spread across the country They work closely with the police and probation services but rely entirely on volunteers prepared to give up their time to work with people often otherwise shunned by communities Circles offer support to the person concerned but also hold them accountable for their future behaviour They aim to ensure there are no more victims This book is based on original research and provides a close up picture of how these Circles of Support and Accountability work in practice It brings together for the first time the voices of all the participants from the offenders and the volunteers through to the Coordinators who link the volunteers to the professionals in the form of the police and probation services The research was commissioned by Circles UK and funded by the Wates Foundation and the University of Leeds School of Law Managing Healthy Livestock Production and Consumption Nadia El-Hage Scialabba,2021-12-02

Managing Healthy Livestock Production and Consumption is a highly interdisciplinary resource based on scientific and empirical evidence. It is illustrated with best practices of low input livestock systems from different continents and offers predictive modelling alternatives for a more resilient future. By addressing gaps of knowledge and presenting scientific perspective studies of livestock's impact on the environment and the global food supply up to 2050, this book is useful for those advocating for sustainable food systems. Existing evidence of the effects of livestock production on food quality and nutrition is reviewed. Livestock production and consumption is a highly diverse topic where current publications only include focus on a single aspect of the issues, for example greenhouse gas emissions or health impacts leading to unilateral decisions such as refraining from meat consumption. However, animals are necessary to soil fertility and ecosystems balance and a more realistic resource is necessary for researchers, scientists and policy makers. This book clarifies perceptions by presenting sound scientific evidence across livestock landscapes for the scientific community to better appreciate the ecological web of life and the social web of community related to livestock production. An edited work written by globally diverse scientists and practitioners including field workers, technicians and policy makers, this is a valuable resource for researchers, teachers and development agents working in the area of sustainable livestock production and consumption of animal source foods. National, international organizations, policy makers and donors interested in sustainable development of the livestock sector will also find the information here practical and applicable. Describes the public health impacts of sustainable diets and livestock products. Presents the impacts of livestock production on the environment and food supply. Explores future scenarios up to 2050 of low input livestock systems. Includes current case studies of low input livestock systems that offer potential for scaling up and replication for sustainable livestock futures.

The United Nations world water development report, 2017 WWAP, UNESCO, 2017-03-15. The United Nations World Water Assessment Programme WWAP is hosted and led by UNESCO. WWAP brings together the work of 31 UN Water Members and 38 Partners to publish The United Nations World Water Development Report WWDR series. The annual World Water Development Reports focus on strategic water issues. UN Water Members and Partners, all experts in their respective fields, contribute the latest findings on a specific theme. The 2017 edition of the World Water Development Report focuses on Wastewater and seeks to inform decision makers inside and outside the water community about the importance of managing wastewater as an undervalued and sustainable source of water, energy, nutrients and other recoverable by products rather than something to be disposed of or a nuisance to be ignored. The report's title Wastewater: The Untapped Resource reflects the critical role that wastewater is poised to play in the context of a circular economy whereby economic development is balanced with the protection of natural resources and environmental sustainability and where a cleaner and more sustainable economy has a positive effect on the water quality. Improved wastewater management is not only critical to achieving the Sustainable Development Goal on clean water and sanitation (SDG 6) but also to other goals of the 2030 Agenda for Sustainable Development.
