rodding through this nostalgic look at vintage speed equipment When most people think of speed parts they rewind a few  
decades and think back to the Ford flatheads that were so prevalent in the 1940s and 1950s However did you know that the  
speed parts industry began way back in the Model T era It s true As soon as vehicles were mass produced manufacturers  
were looking for ways to make them faster Manufacturers such as Roof Rajo Winfield Miller Frontenac and Holley made  
speed parts for 4 cylinder Model T engines and accomplished speeds of up to 100 mph In Vintage Speed Parts The  
Equipment That Fueled the Industry veteran hot rod historian Tony Thacker looks at the history of hot rodding through the  
eyes of speed equipment manufacturers Covered chronologically the book begins with the early 4 cylinder engines In 1932  
Henry Ford introduced the flathead V 8 which was slow to be adopted as the engine of choice in racing until the parts  
industry caught up Once it did the flathead although interrupted by the war was the engine to run until the automobile  
manufacturers introduced overhead valve V 8 engines in the late 1940s Chrysler s early 1950s Hemi and Chevrolet s small  
block V 8 in 1955 spelled the end for the flattie Both mills dominated well into the 1970s and the speed industry was there to  
support all platforms in spades During that period every auto manufacturer made a V 8 worthy of modification and the speed  
industry boomed Eventually the speed equipment manufacturers grew to the point of becoming corporate entities as mergers  
and acquisitions became the much less interesting story Parts covered include special cylinder heads magnetos camshaft and  
valvetrain upgrades downdraft carburetors headers multiple carburetor setups and even superchargers Everyone figured out  
how to make engines more powerful upgrading with the type of parts that were being produced decades later even to today
