Lambert,2008-02-04 In the first edition of Calcium Signaling Protocols I began by writing The regulation of intracellular Ca^{2+} is a common theme presented in many papers over the last 20 or so years and the description of the Ca^{2+} sensitive indicator dye fura 2 in 1985 resulted in a massive increase in these types of studies This statement is as true in 2005 as it was in 1999 but 20 or so years is now 30 years There has been some reorganization of the volume such that there are now 22 chapters including five new ones all written by experts in their field These new chapters include use of the FlexStation and electrophysiological measurement of Ca^{2+} channel activity The book is

broken into six parts Part I is a general coverage of basic theory and the simplest use of fluorescent indicators Part II covers specialist measurement 2 systems and Part III covers measurement of Ca channel activity Assessment of 2 release of stored Ca is covered in some detail in Part IV with Parts V and VI cover 2 ing specialist measurement techniques and Ca sensitive targets Putting a book like this together even as a second edition takes time and I am again indebted to the individual authors for their help and patience I am also very grateful to Professor John M Walker the series editor for his continued help and advice over the course of this project

Calcium Signalling in Alzheimer's Disease Mounia Chami,2021-04-22
Alzheimer s disease AD is the most well known neurodegenerative disorder causing dementia In recent decades several studies have reported calcium dysregulation in AD occurring through the intervention of several calcium receptors and channels and affecting different cellular compartments such as mitochondria the endoplasmic reticulum lysosomes and microdomains within the plasma membrane Calcium signalling dysregulation is now considered a common proximal cause of dysfunctional neurons and glial supporting cells This book gathers the newest results and advances in calcium signaling deregulation mechanisms in AD how they are linked to other players involved in AD and the potential therapies targeting calcium alterations to treat AD

Models of Calcium Signalling Geneviève Dupont,Martin Falcke,Vivien Kirk,James Sneyd,2016-06-07 This book discusses the ways in which mathematical computational and modelling methods can be used to help understand the dynamics of intracellular calcium The concentration of free intracellular calcium is vital for controlling a wide range of cellular processes and is thus of great physiological importance However because of the complex ways in which the calcium concentration varies it is also of great mathematical interest This book presents the general modelling theory as well as a large number of specific case examples to show how mathematical modelling can interact with experimental approaches in an interdisciplinary and multifaceted approach to the study of an important physiological control mechanism Genevi ve Dupont is FNRS Research Director at the Unit of Theoretical Chronobiology of the Universit Libre de Bruxelles Martin Falcke is head of the Mathematical Cell Physiology group at the Max Delbr ck Center for Molecular Medicine Berlin Vivien Kirk is an Associate Professor in the Department of Mathematics at the University of Auckland New Zealand James Sneyd is a Professor in the Department of Mathematics at The University of Auckland New Zealand

Calcium Signalling in Cancer G. V. Sherbet,2000-11-29 Calcium signalling occupies a preeminent position in the signal transduction system of the cell by virtue of its participation in a wide range of physiological functions together with the biological events associated with genetic expression cell proliferation and apoptosis as well as cell differentiation and morphogenesis It is an important feature of cell adhesion and motility the integrity of the calcium binding proteins themselves is a basic requirement of normal biological function In fact the deregulation of calcium signaling is now regarded as the primary event in the pathogenesis growth invasion and secondary spread of cancer Calcium Signalling in Cancer is a concise up to date treatise on the transduction signals induced by calcium that considers how alterations in this calcium
