textbook teaches Calculus II skills as needed such as the technique of integrating via trigonometric substitution The textbook also reviews some Calculus I skills which students often forget such as the mean value theorem l Hopital s rule and the chain rule This is not done in an introductory chapter or an appendix but in the main text as these ideas first become useful

IMPORTANT DISTINCTIONS Boxes of important distinctions are included in order to help students distinguish between similar concepts like average speed and average velocity between velocity and acceleration or between mass and weight

TABLE OF EQUATIONS There is a handy table of equations organized by topic on the back cover of the textbook The equations in the text but not on the cover also include notes to help students understand any limitations that the equations may have e g some equations only apply if acceleration is uniform or if mass is constant

CONCISE OUTLINE FORMAT The text is conveniently organized by specific topic to help students who may not be reading straight through but who may be searching for a specific idea or who may be reviewing material that they read previously There is also a handy index to help locate concepts quickly Examples and problem solving strategies clearly stand out from discussions of concepts

MATHEMATICAL quality was favored over quantity Simple plug and chug examples and problems are scarce since the audience for this book is independent students

PRACTICE The end of each chapter has a good selection of instructive conceptual questions and practice problems

HINTS ANSWERS 100% of the conceptual questions have both hints and answers since it s crucial to develop a solid understanding of the concepts in order to succeed in physics Some of the practice problems have answers to help independent students gain confidence by reproducing the same answers while 100% of the practice problems have hints so that students can see if they are solving the problems correctly even if the problem doesn t have the answer in the back
