David L. Andrews, Andrey A. Demidov, 2012-12-06 Here is the first graduate level textbook to offer an introduction to the field of laser spectroscopy Chapters cover a broad range of topics in detail emphasizing the theoretical and experimental aspects of the field This much needed text will allow students to explore current research and gain an understanding of the analytical and industrial applications of laser spectroscopy *Laser Spectroscopy: Basic principles* Wolfgang Demtröder, 2008

*Laser Spectroscopy* W. Demtröder, 1982 *Laser Spectroscopy* Wolfgang Demtröder, 2013-06-29 The impact of lasers on spectroscopy can hardly be overestimated Lasers represent intense light sources with spectral energy densities which may exceed those of incoherent sources by several orders of magnitude Furthermore because of their extremely small bandwidth single mode lasers allow a spectral resolution which far exceeds that of conventional spectrometers Many experiments which could not be done before the application of lasers because of lack of intensity or insufficient resolution are readily performed with lasers Now several thousands of laser lines are known which span the whole spectral range from the vacuum ultraviolet to the far infrared region Of particular interest are the continuously tunable lasers which may in many cases replace wavelength selecting elements such as spectrometers or interferometers In combination with optical frequency mixing techniques such as continuously tunable monochromatic coherent light sources are available at nearly any desired wavelength above 100 nm *Laser Spectroscopy* Wolfgang Demtröder, 2008 **Laser Spectroscopy** W.

Demtröder, 1996 The first part which discusses the basic concepts of absorption and emission of light the spectroscopic instrumentation for wavelength measurements and detection of light and the spectroscopic properties of lasers is a textbook for graduate students The second part gives a survey on different techniques of laser spectroscopy and their applications with ample references to the original literature **Applied Laser Spectroscopy** Wolfgang Demtröder, Massimo

Inguscio, 2012-12-06 This volume contains the lectures and seminars presented at the NATO Advanced Study Institute on Applied Laser Spectroscopy the fourteenth course of the Europhysics School of Quantum Electronics held under the supervision of the Quantum Electronics Division of the European Physical Society The Institute was held at Centro I Cappuccini San Miniato Tuscany Italy September 3-15 1989 The Europhysics School of Quantum Electronics was started in 1970 with the aim of providing instruction for young researchers and advanced students already engaged in the area of quantum electronics or wishing to switch to this area from a different background Presently the school is under the direction of Professors F T Arecchi and M Inguscio University of Florence and Prof H Walther University of Munich and has the headquarters at the National Institute of Optics INO Firenze Italy Each time the directors choose a subject of particular interest alternating fundamental topics with technological ones and ask colleagues specifically competent in a given area to take the scientific responsibility for that course **Laser Spectroscopy : Basic Concepts and Instrumentation** , 1980
