November 1997 to March 1998 and was monitored by a steering committee with representatives of the EU member states. This book is dealing with the calculation of costs for road infrastructure and congestion and the allocation of these costs to vehicle types. It focuses on heavy goods vehicles. This is a topic of high relevance for transport policy both on the national and the EU level with a long tradition of political and scientific debate. The study contains a comprehensive methodological comparison of existing models for calculating road capital values and capital costs and for allocating infrastructure costs to vehicle types.
