

What is Art?

Something that is created with imagination and skill and that is beautiful or that expresses important ideas or feelings.
The expression or appreciation of human creative skill and imagination.

Etymology of Art

The term "art" is related to the Latin word "aurea" meaning, **gold** or **craft**. The first known use of the word comes from 10th-century manuscripts. However, the word art and its many variants (artem, eart, etc.) have probably existed since the founding of Rome.

Philosophy of Art

Art as Representation or Mimesis

Plato first developed the idea of art as **"mimesis,"** which, in Greek, means **copying** or **imitation**. For this reason, the primary meaning of art was, for centuries, defined as the representation or replication of something that is **beautiful** or **meaningful**.

Art as Form

Art should not have a concept but should be judged only on its formal qualities because the content of a work of art is not of **aesthetic interest**. Formal qualities became particularly important when art became more abstract in the 20th century, and the principles of art and design (**balance, rhythm, harmony, unity**) were used to define and assess art.

Art as Expression of Emotional Content

Artists look to connect with and evoke responses from their viewers.

Contemporary Art

Defined as **art produced by artists living today**.

Pre-Colonial Art Period

In **art historical terms**, we refer before the coming of the first colonizer as **pre-colonial**.

In **political terms**, we refer to it as **"indigenous"** to emphasize the idea that our ancestors have been making art even before colonization.

In **cultural terms**, we refer to it as **"pre-colonial"** to use as a general way of life before colonization.

Was there "art" before colonization?

Pre-colonial Filipinos have been making images before colonization. This exemplified by the country's rich tradition in carving.

Some of the most ancient forms are made out of

terracotta

Teracotta - commonly used term for a type of natural plastic clay that hardens when dried.

The tendency toward ornamentation could be also seen in the way early Filipinos adorned their bodies.

Bosom Codex - representations of various

ethnolinguistic groups

Aside from its aesthetic function, **talismans** were valued because it was believed to protect the individual from evil spirits, and in some cases, it was considered as a badge of maturity and bravery.

tauheed - unity of God, emphasizes the **inimportance of nature** and the incomprehensible greatness of divine being. (See **monotheism of God**, in the sense that he is one and there is no god but he) Islam rejects the direct copying of images in nature. **Ukkil/Okrir** - **curvilinear and flowing** forms in Islamic arts.

Retable - decorative alter niche in a church

Nisa Crucifix - series of 14 paintings or relief sculptures depicting Christ's crucifixion and resurrection

Passyon/Pasasa - Biblical narration of Christ's passion chanted in an improvised melody.

Angkinal/Sansulat - operetta which features jumping and dancing interspersed with prose dialogue which allowed the story to be carried out in song. **Semakula** - passion play, narrative was culled entirely from the biblical account of Christ's passion and death on the cross, adapted into verse form and translated to local language.

Komedya - depicts the conflict between Muslims and Christians

Komedya de Santo - centers on the life of Christ or of any saint

Secular Komedya - Example: Moro-moro, a typical mono-mono story would usually involve a love story between a Christian hero and an Islamic heroine or vice versa.

Doctrina Christiana - printed in 1593 in Spanish and Tagalog by Dominican priests, first printed book in the Philippines, compilation of song lyrics, commandments, sacraments, and other catechetical material.

Carta Hydrographica y Chorographica de las Islas Filipinas - first scientific map of the Philippines, surrounding the map are **legends** of everyday life that focus on different types of people and their surroundings called **tipos del pais**.

CONTEXT OF ARTS

Artist's Background

The artist's age, gender, culture, economic conditions, social environment, and disposition affect art production.

Nature

Nature can be seen as a source of inspiration and wellspring of many art production.

Everyday Life

The sense of touch, taste and smell are engaged along with the visual sense. Our traditional art has always been an integral part of daily life.

PERFORMING ARTS

Theater

Theater has several meanings. First, it denotes a building in which performance is held with an audience and this sense the term refers to **physical space**.

Audience

The essence of theater is the **interaction** between the performer and the audience. Theater needs to be experienced live, and the audience provide **immediate feedback** to the performers.

The SAGE Encyclopedia of Action Research David Coghlan, Mary Brydon-Miller, 2014-08-11 Action research is a term used to describe a family of related approaches that integrate theory and action with a goal of addressing important organizational community and social issues together with those who experience them. It focuses on the creation of areas for collaborative learning and the design, enactment, and evaluation of liberating actions through combining action and research reflection and action in an ongoing cycle of cogenerative knowledge. While the roots of these methodologies go back to the 1940s, there has been a dramatic increase in research output and adoption in university curricula over the past decade. This is now an area of high popularity among academics and researchers from various fields, especially business and organization studies, education, health care, nursing, development studies, and social and community work. The SAGE Encyclopedia of Action Research brings together the many strands of action research and addresses the interplay between these disciplines by presenting a state of the art overview and comprehensive breakdown of the key tenets and methods of action research, as well as detailing the work of key theorists and contributors to action research.

Promoting Transformative Practices for Sustainability in Early Childhood Education and Care Fabio Dovigo, Sule Alici, 2025-09-30 Offering a fresh perspective on sustainability in the realm of Early Childhood Education and Care (ECEC). Promoting Transformative Practices for Sustainability in Early Childhood Education and Care invites educators, policymakers, and researchers to rethink how young children's engagement with sustainability extends beyond nature experiences, promoting a richer, multi-dimensional understanding. This unique book provides a wider understanding of the relationship between early childhood education and sustainability through a multi-faceted picture of the political, economic, social, cultural, and natural dimensions embedded in sustainable policies and practices. Aligning with UNESCO's vision of sustainability, this book recognises the interdependencies between these dimensions, emphasising the importance of addressing intergenerational equity and social justice, especially for children, to be prepared for and thrive in a rapidly evolving world. This book is structured in two main sections: the first explores innovative methodologies like sensory ethnography, constructivist Grounded Theory, and critical participatory action research, while offering frameworks for effective education for sustainability (ECEfS); the second part evaluates recent ECEfS projects focusing on promoting children's rights, agency, and well-being, and highlights how shared leadership and advocacy can drive sustainable futures in ECEC settings. By combining research-based insights with practical examples, this book is a valuable resource for educators seeking to implement transformative practices in ECEC. Its focus on empowering educators and fostering child-centred advocacy makes it an essential read for those committed to building a sustainable future through early education.
