STUDENT CASE STUDY PROJECT

Purpose of the Assignment

The purpose of this assignment is twofold: first, to provide you with the opportunity to do a focused analysis of one student using the management frameworks discussed in our seminars; and second, to provide you with practice in using data gathering strategies that will help you learn essential information necessary in order to teach students effectively. This is particularly important for the teacher working in a diverse classroom setting where students come from cultures and speak languages with which the teacher is unfamiliar and have contextual issues that must be considered in order to help them succeed. I hope that this case study work will challenge your assumptions/beliefs about the learners in your class, their needs and capabilities.

Literature Search: related within Final Paper

Read at least 1 related article (beyond those assigned in class) that help you to develop a knowledge base related to the issues facing this student. Begin as soon as you have a case hypothesis regarding issues with which this child is coping. Find readings throughout the semester as it will help you on a day-to-day basis to work more effectively with this student. Your completion of the literature search will be evidenced by your reference to readings within your final reflection paper.
