Make sure that the watch is exposed to light for at least 10 minutes, position the hands so it is positioned as a source of bright light. *Also, make sure that the watch is positioned as a source of bright light, as there are situations where the brightness of the hands is not guaranteed.

*This watch contains no apparatus, device, which is as most exposed to light. Leaving the watch in the dark can cause the battery to run down, which will result in some watch functions not being displayed. If the battery goes dead, you will have to re-configure watch settings after recharging. To ensure normal watch operation, be sure to keep it exposed to light as much as possible.

Battery charges in the light.
