TRANSPORTATION SYSTEMS IN BUILDINGS. DGVD2020]. ,2020 *European Building Construction Illustrated*

Francis D. K. Ching, Mark Mulville, 2014-02-10 The first European edition of Francis DK Ching's classic visual guide to the basics of building construction. For nearly four decades the US publication *Building Construction Illustrated* has offered an outstanding introduction to the principles of building construction. This new European edition focuses on the construction methods most commonly used in Europe, referring largely to UK Building Regulations overlaid with British and European while applying Francis DK Ching's clear graphic signature style. It provides a coherent and essential primer presenting all of the basic concepts underlying building construction and equipping readers with useful guidelines for approaching any new materials or techniques they may encounter. *European Building Construction Illustrated* provides a comprehensive and lucid presentation of everything from foundations and floor systems to finish work. Laying out the material and structural choices available, it provides a full understanding of how these choices affect a building's form and dimensions. Complete with more than 1000 illustrations, the book moves through each of the key stages of the design process from site selection to building components, mechanical systems and finishes. Illustrated throughout with clear and accurate drawings that effectively communicate construction processes and materials. Provides an overview of the mainstream construction methods used in Europe. Based around the UK regulatory framework, the book refers to European level regulations where appropriate. References leading environmental assessment methods of BREEAM and LEED while outlining the Passive House Standard. Includes emerging construction methods driven by the sustainability agenda such as structural insulated panels and insulating concrete formwork. Features a chapter dedicated to construction in the Middle East focusing on the Gulf States.

Elevator Traffic Handbook Gina Barney, Lutfi Al-Sharif, 2015-08-27 This second edition of this well-respected book covers all aspects of the traffic design and control of vertical transportation systems in buildings, making it an essential reference for vertical transportation engineers, other members of the design team and researchers. The book introduces the basic principles of circulation, outlines traffic design methods and examines and analyses traffic control using worked examples and case studies to illustrate key points. The latest analysis techniques are set out and the book is up to date with current technology. A unique and well-established book, this much-needed new edition features extensive updates to technology and practice, drawing on the latest international research. People Flow in Buildings Marja-Liisa Siikonen, 2021-10-04 Discover how to measure, control, model and plan people flow within modern buildings with this one-stop resource from a leading professional. *People Flow in Buildings* delivers a comprehensive and insightful description of people flow analysis with software-based tools. The book offers readers an up-to-date overview of mathematical optimization methods used in control systems and transportation planning methods used to manage vertical and horizontal transportation. The text
