stemOnext  
OPPORTUNITY FUND

CREATING SPACE FOR ALL LEARNERS

Strategies are the broad categories within each large concept: Increasing Access, Youth-Centric, and Skill Development. Tactics are the specific actions and tools for each strategy.

## INCREASING ACCESS

Strategies that welcome learners to participation and build on the experiences within the community.

## YOUTH-CENTRIC

Strategies that build on the specific strengths, needs, and challenges of youth.

## SKILL DEVELOPMENT

Strategies that are personally relevant to youth and enable them to develop STEM and 21st century skills.

## **STEM For Kids Framework:**

**Engaging Young Engineers** Angela Stone-MacDonald,2015-06 This title provides instruction on how to teach problem solving and critical thinking to young children birth to 5 using engineering science and routines as a framework The engineering process is an ideal framework for designing learning experiences that support science technology engineering and mathematics STEM learning and cognitive development for young children Young children problem solve in their daily play and teachers and caregivers can promote the development of problem solving and critical thinking skills through intentional activities that support young children s brain development and prepare them for kindergarten Key activities are outlined for each age group with information on how each activity teaches young children to be curious persistent flexible reflective and collaborative This title also provides specific guidance for supporting problem solving and science learning in inclusive classrooms using the universal design for learning UDL model and it helps teachers to prepare children to work towards the Common Core State Standards CCSS for kindergarten math and the Next Generation Science Standards NGSS for kindergarten science This title can serve as a supplemental text for early childhood curriculum or instructional methods courses

**STEM Learning with Young Children** Shelly Counsell,Lawrence Escalada,Rosemary Geiken,Melissa Sander,Jill Uhlenberg,Beth Van Meeteren,Sonia Yoshizawa,Betty Zan,2016 This teacher s guide provides the background information STEM concepts and strategies needed to successfully implement an early STEM curriculum Ramps and Pathways with young children ages 3 8 R P actively engages young children in designing and building ramp structures using wooden cove molding releasing marbles on the structures and observing what happens Children use logical mathematical thinking and problem solving skills as they explore science concepts related to motion force and energy This

guide helps teachers to Structure and organize an engaging STEM learning environment Understand and promote logical mathematical and scientific thinking during investigations Promote social settings that enhance communication cooperation and collaboration Make the necessary accommodations and modifications for diverse learners Integrate STEM concepts and skills with other content areas Align teaching and learning with Next Generation Science Standards NGSS and Common Core State Standards CCSS Assess STEM learning using formative and summative assessments Establish adult learning communities to support ongoing professional development Help children develop habits and behaviors that contribute to positive attitudes toward STEM This one of a kind resource uses a newly created Inquiry Teaching Model ITM as the conceptual framework and devotes specific attention to the importance of an inclusive and social STEM learning environment in which children are free to collaborate take risks and investigate within the context of exploratory and constructive play

*Full STEAM Ahead* Cherie P. Pandora,Kathy Fredrick,2017-10-03 This book is a toolkit for youth and young adult librarians school and public who wish to incorporate science technology engineering art and math STEAM into their programs and collections but aren't sure where to begin Most educators are well aware of the reasons for emphasizing STEAM topics that fall within the broad headings of science technology engineering arts and mathematics in the curriculum regardless of grade level But how do librarians who work with tweens in middle school high school and public libraries fit into the picture and play their roles to underscore their relevance in making STEAM initiatives successful This book answers those key questions providing program guidelines and resources for each of the STEAM areas Readers will learn how to collaborate in STEAM efforts by providing information on resources activities standards conferences museums programs and professional organizations Emphasis is placed on encouraging girls and minorities to take part in and get excited about STEAM In addition the book examines how makerspaces can enhance this initiative how to connect your programs to educational standards where to find funding how to effectively promote your resources and programs including how school and public librarians can collaborate to maximize their efforts how to find and provide professional development and how to evaluate your program to make further improvements and boost effectiveness Whether you are on the cusp of launching a STEAM initiative or looking for ways to grow and enhance your program this book will be an invaluable resource

Teaching STEM Literacy Juliana Texley,Ruth M. Ruud,2017-12-01 Teaching STEM Literacy is comprised of ready made open ended lessons reviewed and tested by teachers which help educators integrate STEM learning into the early childhood classroom Lessons are linked to the Next Generation Science Standards and encourage creative ideas for three dimensional STEM learning that are developmentally appropriate and exemplified through children's literature The three dimensional STEM learning content concepts and practices comes in twelve ready made open ended teaching units that make it easy to teach science and inquiry to young children This book uses the 5E framework engagement exploration explanation elaboration and evaluation to cultivate children's skills of observation questioning and data collection by combining discovery

problem solving and engineering solutions to authentic questions that young children might ask Juliana Texley holds a master s in biology and chemistry and a PhD in curriculum development science education from Wayne State University and has over thirty years of teaching experience She is a graduate level adjunct professor specializing in educational technology and assessment science and science teaching at Central Michigan University and Lesley University in Massachusetts Texley has been a National Science Teachers Association NSTA member for thirty years and served as president from 2014 2015 She is on the board for Young Voices for the Planet and led the development and evaluation of online learning programs for JASON Learning Ruth M Ruud has over thirty five years of teaching experience ranging from early childhood to undergraduate studies She has a master s degree in education with additional coursework in all areas of science A former Delta Education FOSS Full Option Science System consultant Ruth currently works as an adjunct professor teaching physical geography courses at Cleveland State University She served as president of the Pennsylvania Science Teachers Association and has chaired a number of committees of the National Science Teachers Association NSTA is a member of the NSTA Recommends committee and is the head reviewer for the NSTA Shell Science Lab Challenge Stem Kids Journal: Book to Record Your Inventions, Big Ideas Or Stem Challenges! Sumita Mukherjee,2019-04 Inspire and encourage your child to design the future with the STEM Kids Journal This book includes an Engineering Design Process poster and the prompts Ask Imagine Plan Create Experiment Improve It takes kids through each of these steps with questions and places to sketch At the end of each section they will have a fully developed idea Perfect for project notes sketches ideas data and research notes With an emphasis on STEM education continuing to grow all over the world this journal prepares kids to stay ahead of the curve It will have them thinking like engineers with STEM focused content appropriate for all levels of learning With the Engineering Design Process incorporated into every challenge kids will practice and develop their problem solving and design skills so that they can learn to overcome any obstacle The structure in this guide provides an excellent framework for teachers who might not feel versed in all areas of STEM It has a designated space for recording daily ideas inventions and STEM challenges A journal kids will enjoy **Word Study for Literacy Leaders** Anne C. Ittner,Amy Frederick,Darl Kiernan,Donald R. Bear,2023-08-22 Word study is an approach to teaching phonics vocabulary and spelling that is based on a developmental model described by Henderson and his students Given the reciprocal nature between reading and writing phonics spelling and vocabulary are integrated in instruction Teachers understand that this word study approach integrates phonics spelling and vocabulary and have challenged us to share concrete examples of how teachers organize and implement word study and how literacy educators in universities and school districts conduct professional learning for word study The primary goal then is to make word study work for our students The authors of each chapter show how literacy leaders and teacher educators guide others in a wide variety of educational settings Stories in this volume capture classroom conversations describe professional learning communities and present coaching scenarios that will resonate with reader s

Moore, 2015-07-03 *STEM Road Map A Framework for Integrated STEM Education* is the first resource to offer an integrated STEM curricula encompassing the entire K-12 spectrum with complete grade level learning based on a spiraled approach to building conceptual understanding. A team of over thirty STEM education professionals from across the U.S. collaborated on the important work of mapping out the Common Core standards in mathematics and English language arts the Next Generation Science Standards performance expectations and the Framework for 21st Century Learning into a coordinated integrated STEM education curriculum map. The book is structured in three main parts Conceptualizing STEM STEM Curriculum Maps and Building Capacity for STEM designed to build common understandings of integrated STEM provide rich curriculum maps for implementing integrated STEM at the classroom level and supports to enable systemic transformation to an integrated STEM approach. The STEM Road Map places the power into educators' hands to implement integrated STEM learning within their classrooms without the need for extensive resources making it a reality for all students     *STEM Road Map 2.0* Carla C. Johnson, Erin E. Peters-Burton, Tamara J. Moore, 2021-03-10

Featuring a team of over thirty STEM education professionals from across the United States the updated and revised edition of this landmark book provides an integrated STEM curriculum encompassing the entire K-12 spectrum with complete grade level learning based on a spiraled approach to building conceptual understanding. Taking into account the last five years of evolution in STEM education the second edition includes an increased focus on computer science computational thinking mathematics and the arts as well as cultural relevance and addressing the needs of diverse learners and underrepresented students. Divided into three main parts Conceptualizing STEM STEM Curriculum Maps and Building Capacity for STEM each section is designed to build common understandings of integrated STEM provide rich curriculum maps for implementing integrated STEM at the classroom level and offer supports to enable systemic transformation to an integrated STEM approach. Written for teachers policymakers and administrators this second edition is fully updated to account for the needs of K-12 learners in the innovation age *STEM Road Map 2.0* enables educators to implement integrated STEM learning into their classroom without the need for extensive resources empowering educators and supporting students     *Teaching STEM in the Early Years* Sally Moomaw, 2013-06-15 The foundation for science technology engineering and mathematics STEM education begins in the early years. This book provides more than ninety activities and learning center ideas that seamlessly integrate STEM throughout early childhood classrooms. These hands on STEM experiences enhance cooking art and music activities block play and sensory table exploration and field trips and outdoor time. Information on assessment and early learning standards is also provided. Sally Moomaw EdD has spent much of her career researching and teaching STEM education.
