Tissue Culture in Science and Society D. Wilson, 2011-07-28 This book charts the social and cultural history of the scientific technique known as tissue culture. **Cellular Responses to Stress** C. P. Downes, C. R. Wolf, D. P. Lane, 2014-07-14 Cellular Responses to Stress brings together a group of scientists who work on different but interrelated aspects of cellular stress responses. The book provides state of the art information on the wide spectrum of ways in which cells can respond to different forms of stress induced by chemicals, oxidants and DNA damaging agents. Mechanisms are described that involve altered uptake and efflux of chemical agents, intracellular detoxification and DNA damage responses. Many of these changes trigger a cascade of reactions mediated by stress activated signaling pathways which have the capacity to determine whether a cell will survive or die. The spectrum of topics covered in this book aims to provide a broad overview of our current knowledge of the different forms of adaptive response systems. It is hoped that this text will stimulate further research to establish the relative cellular role of specific response pathways and will enable us to gain a deeper understanding of the mechanisms that allow cells to live or die. This book will be valued by university researchers at all levels, industrial scientists in the pharmaceutical and biotechnology industries and clinical researchers. Originally published in 1999, The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

*Paradise Lost and the Rise of the Novel* Branko Marijanović, 2022-08-17 This book claims that *Paradise Lost* contains all the traits of the great epics as well as the predominant characteristics of early modern novels and that every history of the novel should acknowledge Milton's unintentional contribution to the development of the genre. Milton's Satan is presented as a novelistic character par excellence, preceding memorable literary characters of novelistic provenance like Dostoyevsky's Raskolnikov, Shelley's monster or Kafka's beetle. In addition, this book proves that all the elements of modernity like capitalism, science, all pervasive doubt, the absence of unquestionable ideals, radical individualism and the insatiable desire for self realization and incessant advancement are inherent to both *Paradise Lost* and Satan's character. Just like a fully developed novelistic character and unlike any epic character in history, Satan constantly surprises us by failing, exceeding or simply contradicting our expectations. As such, the book demonstrates that Satan shares more common points with the likes of Tom Jones, Moll Flanders or Lovelace than with the traditional epic heroes like Achilles or Aeneas, proving that the novel as a genre owes an immense debt to Milton's grand epic and that Satan may be perceived as a precursor of the great novelistic
