Interpretation of Data:

Jane's presenting issue of relationship issues can be understood through the Psychodynamic Theory, which explores unconscious processes and unresolved conflicts from her past. Systems Theory is also relevant, as it considers the dynamics within her family and close relationships. These theories inform our assessment and intervention by helping us to understand the underlying patterns in her relationships and by addressing any unresolved emotional conflicts. Potential challenges may include Jane's willingness to explore her past and her readiness to make changes in her current relationships.
