**Christianity** Howard Clark Kee,2005-11-22 To understand the historical beginnings of Christianity requires one not only to examine the documents that the movement produced but also to scrutinize other evidence historical literary and archaeological that can illumine the socio cultural context in which Christianity began and how it responded to the influences that derived from that setting This involves not only analysis of the readily accessible content of the relevant literary evidence but also attention to the world views and assumptions about reality that are inherent in these documents and other phenomena that have survived from this period Attention to the roles of leadership and the modes of formation of social identity in Judaism and the continuing influence of these developments as Christianity began to take shape is important for historical analysis Distinguished New Testament scholar Kee performs such readings of the texts and communities in this dazzling study of early Christian origins In methodological terms the historical study of Christian Origins in all its diversity must involve three different modes of analysis 1 epistemological 2 sociological and 3 eschatological The first concerns the way in which knowledge and communication of it were perceived The second seeks to discern the way in which the community or tradition preserving and conveying this information defined its group identity and its shared values and aims The third focuses on the way in which the group understood and affirmed its ultimate destiny and that of its members in the purpose of God These factors are interrelated and features of one mode of perception strongly influence details of the others but it is useful to consider each of them in its own category in order to discern with greater precision the specific historical features of the spectrum of facets which appear in the evidence that has survived concerning the origins of Christianity
