*Propositions* Robert Stalnaker,2022-12-20 A defense of an ontology of propositions and of some logical resources for representing them It begins with an austere formulation of a theory of propositions in a first order extensional logic but then uses the commitments of this theory to justify an enrichment to modal logic the logic of necessity and possibility as an appropriate framework for regimented languages that are constructed to represent any of our scientific and philosophical commitments Both the proof theory and the model theory of a first order quantified modal logic are developed in detail and it is argued that these formal resources help to sharpen questions about ontology and predication The clarification of predication helps to provide a motivation for extending our ontological commitment to properties and relations that are expressed by predicates and for extending the logic to a higher order modal logic that provides a conception of metaphysical modality that allows for the contingent existence not only of persons and physical objects but also of properties relations and propositions Even though both the specific ontological commitments defended to propositions properties and relations and the logical resources that are used to defend them modal and higher order logic were famously rejected by W V Quine the book adopts a self consciously neo Quinean methodology and argues that the theory that is developed helps to motivate and clarify Quine's naturalistic metaphysical picture Thinking of Necessity Jessica Leech,2023 Jessica Leech sets out a Kant inspired theory of modality i e possibility and necessity She argues that we need logical modal concepts as a condition on our ability to think and metaphysical modal concepts as a condition on our ability to think about the world Necessity has its source in the laws of thought and the conditions of thought
