12.1 Astronomical Time Periods

• Length of day

- Time it takes for Earth to rotate once
- Actually 4 minutes short of 24 hours
- Sidereal day (related to stars)**: based on when a star reaches its highest point in the sky the following day
 - 23 hours 56 minutes (2 will be the same for any star and is the precise rotation period of the earth)
- Solar day**: based on the time it takes for the sun to make one circuit (2 how long it takes the sun to reach its highest point in the sky the following day)
 - 24 hours + 25 seconds

• Length of month

- Synodic month**: period of the moon's orbit
 - 29.5-day cycle
 - Synodic: meeting (2 the earth and moon meet in the sky at the new moon)
- Sidereal month**: 27.33-day cycle

• Length of year

- Tropical year**: based on the seasons which are measured as time from the March Equinox
- Sidereal year**: earth completes one full orbit relative to the stars
 - 20 minutes shorter than the tropical year

The difference between the sidereal year and the tropical year arises from Earth's elliptical orbit around the sun (eccentricity = 0.0167). The sun is not only changes the orientation of the axis in space but also changes the location of Earth's orbit so that the seasons occur. Each year the location of the equinoxes will move along the orbit about 1/2° of the way around the orbit. If you do the math, you find that 1/2° of a year is about 20 minutes, which explains the 20-minute difference between the tropical year and the sidereal year.

• Planetary periods

- Ratio of the planet's complete orbital period (P_{syn}) to its synodic period (P_{syn}) must equal the ratio of Earth's orbital period (1 yr) to the time required to the "extra" distance

$$\frac{P_{\text{syn}}}{P_{\text{syn}}} = \frac{1 \text{ yr}}{P_{\text{syn}} - 1 \text{ yr}}$$

$$\text{inner planets: } P_{\text{syn}} - P_{\text{syn}} = \frac{1 \text{ yr}}{P_{\text{syn}} - 1 \text{ yr}}$$

$$\text{outer planets: } P_{\text{syn}} - P_{\text{syn}} = \frac{1 \text{ yr}}{P_{\text{syn}} - 1 \text{ yr}}$$

- Sidereal Period**: time a planet takes to orbit the sun relative to distant stars

LoPresto, 2005 Book includes CD and Student Access Kit for the Astronomy Place **Spiritually-Engaged Knowledge** Jennifer Crawford, 2017-03-02 In a supposedly global age which not everyone accepts the late Dr Jennifer Crawford has brought together a range of disciplines in her creation of a unified sensitive way of knowing for the global era Drawing upon her academic and lived experience in philosophy environmental science social work and feminism together with a deep spiritual commitment Jennifer Crawford has deftly woven together complex ideas in her reconceptualisation of global justice **Spiritually Engaged Knowledge** The Attentive Heart is framed within the author's troubling encounters in India recounted in the Prologue and Epilogue These transformative experiences inspired her multi disciplinary exploration of justice which took her beyond the boundaries of Western epistemology Locating the global the author defines what it is to be a member of a global community in which cross cultural encounters bring forth the possibility of new genre of knowledge Crawford situates her argument within contemporary philosophical contexts drawing upon postmodern discourse globalisation theory and the realisation of shared horizon for all human knowledge which offers up a potential for knowing globally Crawford takes the reader through feminist theory the ethic of care the craft of othering surrender to the other and to our relationship with the earth which she argues can be reconfigured into an ethically based way of knowing Drawing on a range of belief systems including Australian Aboriginal spirituality Christianity Buddhism Hinduism metaphysics and Western philosophy Crawford rebuilds an inclusive compassionate redefinition of care for the new millennium which she calls spiritually engaged knowledge *Astronomy, the Cosmic Perspective* Michael Zeilik, John E. Gaustad, 1983 The ninth edition of this successful textbook describes the full range of the astronomical universe and how astronomers think about the cosmos **Alker and IR** Renée Marlin-Bennett, 2012-03-12 International Relations have rarely been considered a synthesis of humanistic and social sciences approaches to understand the complex connections of a global and globalizing world One of the few scholars to have accomplished this creative blend was Hayward R Alker Alker and IR presents a set of visionary and original essays from scholars who have been profoundly influenced by Alker's approach to global studies They build on the foundation he

laid demonstrating the practicality and usefulness of ethically grounded theoretically informed and interdisciplinary research for producing knowledge They show how substantive boundaries can be crossed and methodological rules rewritten in the search for a deeper more contextualized approach to global politics This book will be of interest to researchers and students of international relations and global politics

In Defence of Cosmopsychism Khai Wager, 2025-10-16 Is the cosmos itself conscious and could our minds be aspects of its vast overarching consciousness In this ambitious and original study Khai Wager defends cosmopsychism the view that the universe as a whole is conscious and that individual minds like ours derive from this cosmic consciousness Wager situates cosmopsychism within what he calls the landscape of fundamental consciousness bringing it into productive dialogue with closely related views such as panpsychism panqualityism and perennialism The result is a fresh perspective on one of philosophy's deepest puzzles the nature and origin of consciousness The problem of phenomenal consciousness asks how subjective experience can emerge from non-conscious matter Fundamental approaches reject the idea that consciousness arises from non-conscious matter instead proposing that it is present at the most basic level of reality Panpsychism the most prominent such view holds that all fundamental microphysical entities are conscious This however leads to the combination problem how do billions of micro-level minds combine to form distinct macro-level minds like ours Cosmopsychism offers a radical alternative rather than being formed from a combination of micro-level instances of consciousness individual minds derive from a larger cosmic-level consciousness As a result cosmopsychism sidesteps the combination problem entirely However a new and equally pressing challenge arises the derivation problem how do individual minds derive from the cosmic consciousness Through rigorous and insightful analysis Wager argues that cosmopsychism can navigate these problems and offers a compelling alternative to both physicalism and panpsychism As such this first book-length treatment of cosmopsychism makes an illuminating contribution to debates about the nature of reality and our place within it

Astronomy Media Workbook Michael C. LoPresto, Jeffrey O. Bennett, 2007 This revised and expanded popular media workbook is provided with all new copies of Bennett's book and includes a wide selection of in-depth activities using resources from The Astronomy Place and Voyager SkyGazer College Edition v3.6 planetarium software These thought-provoking projects are suitable for the lab or as assignable homework assignments

The Development of Sociomoral Knowledge Hugh Rosen, 1980 Home to the New York Yankees the Bronx Zoo and

the Grand Concourse the Bronx was at one time a haven for upwardly mobile second generation immigrants eager to leave the crowded tenements of Manhattan in pursuit of the American dream Once hailed as a wonder borough of beautiful homes parks and universities the Bronx became during the 1960s and 1970s a national symbol of urban deterioration Thriving neighborhoods that had long been home to generations of families dissolved under waves of arson crime and housing abandonment turning blocks of apartment buildings into gutted graffiti covered shells and empty trash filled lots In this revealing history of the Bronx Evelyn Gonzalez describes how the once infamous New York City borough underwent one of the most successful and inspiring community revivals in American history From its earliest beginnings as a loose cluster of commuter villages to its current status as a densely populated home for New York s growing and increasingly more diverse African American and Hispanic populations this book shows how the Bronx interacted with and was affected by the rest of New York City as it grew from a small colony on the tip of Manhattan into a sprawling metropolis This is the story of the clattering of elevated subways and the cacophony of crowded neighborhoods the heady optimism of industrial progress and the despair of economic recession and the vibrancy of ethnic cultures and the resilience of local grassroots coalitions crucial to the borough s rejuvenation In recounting the varied and extreme transformations this remarkable community has undergone Evelyn Gonzalez argues that it was not racial discrimination rampant crime postwar liberalism or big government that was to blame for the urban crisis that assailed the Bronx during the late 1960s Rather the decline was inextricably connected to the same kinds of social initiatives economic transactions political decisions and simple human choices that had once been central to the development and vitality of the borough Although the history of the Bronx is unquestionably a success story crime poverty and substandard housing still afflict the community today Yet the process of building and rebuilding carries on and the revitalization of neighborhoods and a resurgence of economic growth continue to offer hope for the future

perspectives and alternative intersections Part V on theodicy Authors include thinkers from analytic and continental traditions multiple Christian denominations and other religions and both established and younger scholars providing a full variety of approaches What unites the essays is an attempt to answer these questions from the perspective of biblical testimony historical scholarship modern theological and philosophical thinking about the concept of God non Christian religions science and the arts The result is a combination of in depth analysis and breadth of scope making this a benchmark work for further studies in the theology of suffering and evil *Our Living Multiverse* Fred Adams, 2004 *Philosophia reformata*, 1987 **Religion in Planetary Perspective** William W.
