From Basel II to Basel III. Would Investment Banking be preferred under Basel II? Malte Vieth, 2014-03-25 Master's Thesis from the year 2013 in the subject Economics Finance grade 17 Johannes Gutenberg University Mainz language English abstract. In the year 2007 the first bad signs appeared which predicted that something is happening in global financial markets. An asset bubble in the US housing market started to bust and that event had generated fatal consequences not only for the US but also for the rest of the world. Several major peaks characterize the recent financial crisis also named subprime crisis such as the country default of Iceland though subprime crisis was not the main cause or the nationalization of the mortgage corporations Freddie Mac and Fannie Mae by the US government. Certainly no one forgets the queues of people waiting outside the branches of the British bank Northern Rock to withdraw their savings from the bank as a result of rumors about liquidity problems of this institution. Some of the biggest Investment Banks in the world experienced serious difficulties with reference to their liquidity situation and were acquired by other banks. JPMorgan Chase bought the traditional US Investment Bank Bear Stearns and Bank of America merged with the US Investment Bank Merrill Lynch. Clearly one of the most

important events in the course of the subprime crisis was the collapse of the US Investment Bank Lehman Brothers which happened on 15th September 2008 Especially Investment Banks were hit hard by the subprime crisis and also the Investment Banking divisions of universal banks caused many issues for the whole institution One of the main causes of the subprime crisis was identified the Investment Banking business The regulatory framework with reference to the banking supervisory failed in times of financial turmoil and needed to be reformed In particular the capital situation and liquidity profile of many banks were not adequate compared to the risks these banks were exposed to Risks resulting from positions in the trading book market to market and risks resulting from offbalance sheet items which were not monitored by supervisory authorities needed to be emphasized When the crisis hit the capital requirements on the banking book were sufficiently deep to safeguard banks The capital requirements on the trading book however were nowhere strong enough to absorb the losses Dayal 2011 p 17 The new regulatory framework namely Basel III developed by the Basel Committee on Banking Supervisions which was finalized in 2011 focused on these risks [UGC NET JRF Commerce Book- Banking and Financial Institutions \(Self-study and online classes Series\)](#) Dheeraj Kumar Singh, Best Book for UGC NET JRF Commerce PhD Entrance Assistant Professor Examination Based on recent trend of examination Consisting more than 700MCQ **Quantitative Risk Management**
