**Defensible Space; Crime Prevention Through Urban Design** Oscar Newman,1972 Statistics based on New York City Housing Authority records    *Creating Defensible Space* Oscar Newman,1997 The appearance of Oscar Newman s

Defensible Space in 1972 signaled the establishment of a new criminological subdiscipline that has come to be called by many Crime Prevention Through Environmental Design or CPTED Over the years Mr Newman s ideas have proven to have significant merit in helping the Nation s citizens reclaim their urban neighborhoods This casebook will assist public private organizations with the implementation of Defensible Space theory This monograph draws directly from Mr Newman s experience as consulting architect Illustrations

**Defensible Space; Crime Prevention Through Urban Design** Oscar Newman,1972 Statistics based on New York City Housing Authority records    The Ecology of Aggression Arnold P.

Goldstein,1994-08-31 Adopting a unique situation oriented perspective this book studies the occurrence and control of aggression on the micro meso and macro levels of physical and social ecologies The wide ranging viewpoint clarifies important aspects of all forms of aggression to provide psychologists sociologists and criminologists with a powerful aid for treatment and intervention techniques

**Risk Management Series: Site and Urban Design for Security - Guidance Against Potential Terrorist Attacks** Federal Emergency Agency,U. S. Department Security,2013-01-27 The Federal

Emergency Management Agency FEMA has developed this publication Site and Urban Design for Security Guidance against Potential Terrorist Attacks to provide information and design concepts for the protection of buildings and occupants from site perimeters to the faces of buildings The intended audience includes the design community of architects landscape architects engineers and other consultants working for private institutions building owners and managers and state and local government officials concerned with site planning and design Immediately after September 11 2001 extensive site security measures were put in place particularly in the two target cities of New York and Washington However many of these security measures were applied on an ad hoc basis with little regard for their impacts on development patterns and community character Property owners government entities and others erected security barriers to limit street access and installed a wide variety of security devices on sidewalks buildings and transportation facilities The short term impacts of these measures were certainly justified in the immediate aftermath of the events of September 11 2001 but traffic patterns pedestrian mobility and the vitality of downtown street life were increasingly jeopardized Hence while the main objective of this manual is to reduce physical damage to buildings and related infrastructure through site design the purpose of FEMA 430 is also to ensure that security design provides careful attention to urban design values by maintaining or even enhancing the site amenities and aesthetic quality in urban and semi urban areas This publication focuses on site design aimed to protect buildings from attackers using vehicles carrying explosives These represent the most serious form of attack Large trucks enable terrorists to carry very large amounts of explosives that are capable of causing casualties and destruction over a

range of many hundreds of yards Perimeter barriers and protective design within the site can greatly reduce the possibility of vehicle penetration Introduction of smaller explosive devices carried in suitcases or backpacks must be prevented by pedestrian screening methods Site design for security however may impact the function and amenity of the site and barrier and access control design may impact the quality of the public space within the adjacent neighborhood and community The designer s role is to ensure that public amenity and the aesthetics of the site surroundings are kept in balance with security needs This publication contains a number of examples in which the security amenity balance has been maintained through careful design and collaboration between designers and security experts Much security design work since September 11 2001 has been applied to federal and state projects and these provide many of the design examples shown At present federal government projects are subject to mandatory security guidelines that do not apply to private sector projects but these guidelines provide a valuable information resource in the absence of comparable guidelines or regulations applying to private development Operations and management issues and the detailed design of access control intrusion alarm systems electronic perimeter protection and physical security devices such as locking devices are the province of the security consultant and are not covered here except as they may impact the conceptual design of the site Limited information only is provided on some aspects of chemical biological and radiological CBR attacks that are significant for site designers extensive discussion of approaches to these threats can be found in FEMA 426 *Handbook of Loss Prevention and Crime Prevention* Lawrence J. *Encyclopedia of Victimology and Crime Prevention* Bonnie S. Fisher,Steven P. Lab,2010-02-02 Victimology and crime prevention are growing interrelated areas cutting across several disciplines Victimology examines victims of all sorts of

criminal activity from domestic abuse to street violence to victims in the workplace who lose jobs and pensions due to malfeasance by corporate executives Crime prevention is an important companion to victimology because it offers insight and techniques to prevent situations that lead to crime and attempts to offer ideas and means for mitigating or minimizing the potential for victimization In many ways the two fields have developed along parallel yet separate paths and the literature on both has been scattered across disciplines as varied as sociology law and criminology public health and medicine political science and public policy economics psychology and human services and more The Encyclopedia of Victimology and Crime Prevention provides a comprehensive reference work bringing together such dispersed knowledge as it outlines and discusses the status of victims within the criminal justice system and topics of deterring and preventing victimization in the first place and responding to victims needs Two volumes containing approximately 375 signed entries provide users with the most authoritative and comprehensive reference resource available on victimology and crime prevention both in terms of breadth and depth of coverage In addition to standard entries leading scholars in the field have contributed Anchor Essays that in broad strokes provide starting points for investigating the more salient victimology and crime prevention topics A representative sampling of general topic areas covered includes interpersonal and domestic violence child maltreatment and elder abuse street violence hate crimes and terrorism treatment of victims by the media courts police and politicians community response to crime victims physical design for crime prevention victims of nonviolent crimes deterrence and prevention helping and counseling crime victims international and comparative perspectives and more

*A Level Psychology Through Diagrams* Grahame Hill,2001 DT These highly successful revision guides have been brought right up to date for the new A Level specifications introduced in September 2000 DT Oxford Revision Guides are highly effective for both individual revision and classroom summary work The unique visual format makes the key concepts and processes and the links between them easier to memorize DT Students will save valuable revision time by using these notes instead of condensing their own DT In fact many students are choosing to buy their own copies so that they can colour code or highlight them as they might do with their own revision notes
