Ever wonder why some partners seem to be able to read each other's minds? Why they are so successful at anticipating the other's intentions avoiding all pitfalls and traps and seem to win every time? The answer is that they are not usually guessing by learning defensive signals; it is possible for even novice players to drastically improve their game. Defence is the most difficult part of bridge but it can be made easier by using signals to help your partner along the way to success. The book will enable readers to use, recognise and understand all the standard defensive signals used in bridge and to gain an awareness of alternative methods.

Home Defense Survival Guide Ronald Williams, 2017-06-20

In this guide we are going to discuss how to properly fortify and defend your home from attackers in the event of a disaster scenario where the world has gone bad. If you've read books and resources on preparing for disaster so far, those books and resources have probably focused on preparing for specific kinds of disasters such as natural disasters, EMP attacks, terrorist attacks, nuclear power plant accidents, economic collapses, and so on. The information in this book, however, is relevant to literally any kind of a disaster. The reason why is because in a large and long enough disaster in which the supply of basic necessities such as food and water becomes cut off, once normal people will turn into savages. They will do life-threatening and desperate things in an attempt to get the supplies they need to survive. This means that the once ordinary people in your town or maybe even in your neighborhood will come knocking on your door if they have reason to believe you have necessities and supplies they need and they'll be willing to kill to get it. Here's one of the brutal realities of disaster: people will start killing each other for food, water, and whatever else they need. And the hungrier and thirstier they get, the worse it will become. Ask yourself a question: will you allow your family to become victims of these savages in a disaster? If your answer is a firm and resounding no, then this guide is definitely for you. The average American house is not defensive friendly but fortunately you can modify it so that it is. In this guide we are going to talk about how to fortify and defend your home so you can successfully defend it against looters, raiders, thieves, burglars.

and angry mobs Your house is your castle and you cannot allow it to fall no matter what Your family's lives depend on it The specific subjects that we are going to dive into detail in this guide include the following Why Do You Need To Learn How To Fortify and Defend Your Home Fortifying Your House Building A Defensive Perimeter Around Your House Tactics To Defend Your Home Against Attack Weapons For Defending Your Home Stockpiling Your Home With Essentials and Supplies Building A Safe Room By the end of this guide you will know why you need to fortify your house how to fortify it defensive tactics for defending it stockpiling it and how to build a survival safe room as a last ditch defensive option Now if you're already an expert on tactical home defense then this guide will probably be too basic for you But if you're new to the subject of prepping in general and home defense specifically this book will be an excellent resource for you and a superb starting point I'm also going to deliberately keep this guide short so it's a quick and easy read for you but that still doesn't mean that you should take the information you're about to learn lightly
