Auerbach, 2023-03-14

How the autonomous digital forces jolting our lives as uncontrollable as the weather and plate tectonics are transforming life, society, culture, and politics. David Auerbach's exploration of the phenomenon he has identified as the meganet begins with a simple, startling revelation: There is no hand on the tiller of some of the largest global digital forces that influence our daily lives from corporate sites such as Facebook, Amazon, Google, YouTube, Instagram, and Reddit to the burgeoning metaverse encompassing cryptocurrencies and online gaming to government systems such as China's Social Credit System and India's Aadhaar. As we increasingly integrate our society, culture, and politics within a hyper-networked fabric, Auerbach explains, how the interactions of billions of people with unfathomably large online networks have produced a new sort of beast, ever-changing systems that operate beyond the control of the individuals, companies, and governments that created them. *Meganets* Auerbach explains, have a life of their own, actively resisting attempts to control them as they accumulate data and produce spontaneous, unexpected social groups and uprisings that could not have even existed twenty years ago. And they constantly modify themselves in response to user behavior, resulting in collectively authored algorithms none of us intend or control. These enormous, invisible organisms, exerting great force on our lives, are the new minds of the world, increasingly commandeering our daily lives and inner realities. Auerbach's analysis of these gargantuan, opaque digital forces yield important insights such as: The conventional wisdom that the Googles and Facebooks of this world are tightly run algorithmic entities is a myth. No one is really in control. The efforts at reform to get lies and misinformation off meganets run

into a brick wall because the companies and executives who run them are trapped by the persistent evolving and opaque systems they have created Bitcoin and other cryptocurrencies are uncontrollable and their embrace by elite financial institutions threatens the entire economy We are asking the wrong questions in assuming that if only the Facebooks of this world could be better regulated or broken up that they would be better more ethical citizens Why questions such as making algorithms fair and bias free and whether AI can be a tool for good or evil are wrong and misinformed Auerbach then comes full circle showing that while we cannot ultimately control meganets we can tame them through the counterintuitive measures he describes in detail
