Novel Perspectives on German-Language Comics Studies Lynn M. Kutch, 2016-06-15 Novel Perspectives on German Language Comics Studies History Pedagogy Theory gathers an international team of contributors from two continents whose innovative scholarship demonstrates a regard for comics and graphic novels as works of art in their own right The contributions serve as models for further research that will continue to define the relationship between comics and other traditional high art forms such as literature and the visual arts Novel Perspectives on German Language Comics Studies is the first English language anthology that focuses exclusively on the graphic texts of German speaking countries In its breadth this book functions as an important resource in a limited pool of critical works on German language comics and graphic novels The individual chapters differ significantly from one another in methodology subject matter and style Taken together however they present a cross section of comics and graphic novel scholarship being performed in North America and Europe today Moreover they help to secure a place for these works in a globalized culture of comics This volume's contributors have helped create a new critical language within which this rapidly expanding medium can be read and interpreted

[The Language of Comic Narratives](#) Isabel Ermida, 2008-12-10 The book offers a comprehensive account of how humor works in short stories by presenting a model of narrative comedy that is pragmatically as well as semantically grammatically and stylistically informed It is the first study to combine a sequential analysis of the comic short story with a hierarchical one merging together horizontal and vertical narratological perspectives in a systematic way The book covers the main areas of linguistic analysis and is deliberately

interdisciplinary using input from philosophy sociology and psychology so as to touch upon the nature motivations and functions of humor as a cognitive phenomenon in a social context Crucially The Language of Comic Narratives combines a scholarly approach with a careful explanation of key terms and concepts making it accessible to researchers and students as well as non specialists Moreover it reviews a broad range of historical critical data by examining the source texts and it provides many humorous examples from jokes to extracts from comic narratives Thus it seeks to anchor theory in specific texts and also to show that many linguistic mechanisms of humor are common to jokes and longer literary comic narratives The book tests the model of humorous narratives on a set of comic short stories by British and American writers ranging from Evelyn Waugh and Dorothy Parker through Graham Greene and Corey Ford to David Lodge and Woody Allen The validity of the model is confirmed through a subsequent discussion of apparent counter examples

The Visual Language of Comics Neil Cohn, 2013-12-05 Drawings and sequential images are an integral part of human expression dating back at least

as far as cave paintings and in contemporary society appear most prominently in comics Despite this fundamental part of human identity little work has explored the comprehension and cognitive underpinnings of visual narratives until now This work presents a provocative theory that drawings and sequential images are structured the same as language Building on contemporary theories from linguistics and cognitive psychology it argues that comics are written in a visual language of sequential images that combines with text Like spoken and signed languages visual narratives use a lexicon of systematic patterns stored in memory strategies for combining these patterns into meaningful units and a hierarchic grammar governing the combination of sequential images into coherent expressions Filled with examples and illustrations this book details each of these levels of structure explains how cross cultural differences arise in diverse visual languages of the world and describes what the newest neuroscience research reveals about the brain s comprehension of visual narratives From this emerges the foundation for a new line of research within the linguistic and cognitive sciences raising intriguing questions about the connections between language and the diversity of humans expressive behaviours in the mind and brain
