**Atlas of Creation** Hârun Yahya,2006 Some 150 years ago the British naturalist Charles Darwin proposed a theory based on various observations made during his travels but which could not be supported by any subsequent scientific findings In essence his theory of evolution consisted of various scenarios assumptions and conjectures that Darwin dreamed up in his

own imagination According to his evolution scenario inanimate substances came together by chance to give rise to the first living cell No doubt this claim was highly inaccurate and one that could not be corroborated by any scientific evidence or findings Again according to that myth this single celled life form gradually and again by chance turned into the first living species of microbe in other words it evolved According to the evolution error all the life forms on Earth from bacteria on up to human beings emerged as the result of this same imaginary process Darwin s claims were of course based on no scientific evidence or findings But since the scientific understanding and technological means available at the time were at a fairly primitive level the full extent of the ridiculous and unrealistic nature of his assertions did not emerge fully into the light of day In such a climate Darwin s scenarios received general acceptance from a wide number of circles Publisher
