China Environment Development Review Globalization:

China Environment and Development Review Xiao Zhang, 2016 This book focuses on China's role in international trade along with the country's environmental concerns by investigating the impact of globalization on sustainable development. Climate change has placed the world under a new dilemma and commercial rationality that dominates the world cannot resolve such a dilemma. Therefore, greater wisdom is desperately needed such as establishing new civilized norms and value system. The relationship between trade and poverty is discussed in the book and due to the further effects of globalization around the world, both environment and natural resource usage are analyzed. Librarians ebook available. Subject: Asian Studies, Chinese Studies, Development Studies, Environmental Studies. [Globalization and Environmental Reform](#)
Arthur P. J. Mol, 2003 A balanced look at globalization and its potential environmental effects, both destructive and beneficial.

How China is Reshaping the Global Economy Rhys Jenkins, 2022-06-16 China's growing economic involvement in Sub-Saharan Africa and Latin America has been a source of major controversy. The official Chinese position maintains that the growth of bilateral relations is of mutual benefit and provides a good example of South-South cooperation. Critics on the other hand see the economic relations between China and other developing countries as highly unequal, with most of the benefits accruing to China and a few local elites. They also point to negative socio-economic, political and environmental consequences. **How China is Reshaping the Global Economy: Development Impacts in Africa and Latin America** throws more light on these controversies through a comparative study of China's impact on the two regions. It looks not just at bilateral relations between China and the two regions but also analyses the changes in the global economy brought about as a result of the shift in economic activity from North America and Western Europe to Asia. This book looks at the factors which led to rapid economic growth in China and the way in which this has affected global manufacturing, commodity markets, the international presence of Chinese companies and financial flows. It examines the different forms of Chinese economic involvement in Sub-Saharan Africa and Latin America, the main drivers and economic, social, political and environmental consequences. It ends with a comparison of the two regions that highlights the importance of different histories and political and institutional contexts in determining the impacts of China. Since the first edition of **How China is Reshaping the Global Economy: Development Impacts in Africa and Latin America**, China's role in the global economy has continued to expand and the Chinese government's foreign policy has become more assertive. The global presence of China has been marked by the expansion of the Belt and Road Initiative to almost 150 countries and the trade war between the US and China as well as increased Western concerns over the activities of major Chinese companies such as Huawei. This new edition documents these changes and their implications for SSA and LAC.

Environment & Planning, 2002

New Regional Development Paradigms: Globalization and the new regional development Asfaw Kumssa, T. G. McGee, 2001 The era of globalization is creating profound changes in global relationships changes that are manifest at international regional national and sub national levels making traditional regional development policy obsolete and irrelevant Traditional policy needs to be redefined and reconstructed so it can capture and articulate emerging regional trends and issues The first of four volumes based mainly on Global Forum on Regional Development Policy organized by the United Nations Centre for Regional Development in Nagoya Japan this book presents a broad theoretical and trend analysis of

globalization and its effects on the theory and practice of regional development The book lays out the major components that merit consideration if there is to be new regional planning in this millennium While contributors to the volume do not agree on the effects of globalization on economic growth there is a consensus in the volume that globalization presents a challenge to conventional development theories The challenge for regional planners is to examine the impact and implications of recent structural changes on regional development planning and come up with viable and pragmatic regional development strategies This volume begins to meet that challenge by laying out the major components that merit consideration The following volumes will present detailed case studies of current regional planning practices focusing largely on developing countries
